ENERGY AT WORK

Commercial & Industrial

Product Catalog

Milbank Overview

Energy At Work since 1927

Milbank builds solutions that move power for the residential, commercial, industrial, utility and transportation sectors. Milbank combines more than 85 years of expertise in electrical engineering design and manufacturing with a commitment to develop and globally implement sustainable, integrated power solutions. Milbank's portfolio includes electric metering systems, PowerGen™ wind and solar solutions, and portable power. A third-generation, family-owned business, Milbank is headquartered in Kansas City, Mo. For more information, please visit milbankworks.com.

METERING

Milbank meter sockets have set the standard for quality since 1927. With a 99.97% quality performance, thousands of active products to meet your utility's requirements and tens of millions of sockets installed across the globe, our products help keep energy at work. And with 22 stocking locations across the U.S., and our OneSERT program to help during emergency situations, our meter sockets are ready to go, wherever the job may be.

COMMERCIAL & INDUSTRIAL

When it comes to commercial and industrial products, Milbank has it covered! We offer a complete line of junction boxes, telephone cabinet covers, transformer cabinets, wireways, pushbutton enclosures, consoles and thermal management products. We specialize in custom-built enclosures and are more than happy to design a solution for your specific project. Our commercial meter pedestals are easy to install, fast, safe and secure, and completely customizable.

POWERGEN

Milbank's standby and portable generators give you the peace of mind of living life uninterrupted during increasingly frequent power outages caused by severe weather, high demand and other situations. Our electric vehicle supply equipment, wind turbines and power management systems give you reliable and sustainable ways to reduce both your energy costs and your impact on the environment.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

COMMERCIAL
PEDESTALS

Commercial Pedestals

Attractive | Easy to Install | Secure | Cost-Effective

Milbank Commercial Pedestals are pad-mounted, weatherproof electrical enclosures consisting of a utility pull section with optional meter socket, and a customer section containing distribution and control equipment. Milbank Commercial Pedestals are an attractive, secure, easy to install and cost-effective solution when underground remote site power distribution and control equipment is required, replacing unsightly and inefficient strut and backboard structures.

Strut and backboard

Commercial pedestal

Standard Features

- Type 3R rainproof, vandal-resistant cabinet of polyurethane powder-coated steel (aluminum or stainless steel also available)
- UL Listed
- Isolated lockable & sealable utility metering and lug landing sections
- Lockable customer section for distribution and control equipment with internal deadfront
- Print pocket inside customer section door contains wiring schematics and installation instructions
- Most load centers are UL Listed for use with various manufacturers' circuit breakers
- All stainless steel external hardware (screws, bolts, hinges, handles, hasps and sealing screws)

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

5
COMMERCIAL
PEDESTALS

These units are ideal for controlling and metering:

- Traffic signals
- Street lighting
- Irrigation and sprinkler systems
- Cell towers and telephone vaults
- Pump stations
- Temporary power for fairgrounds, swap meets, outdoor markets, portable offices, holiday lights, etc.
- Outdoor lighting for athletic fields, tennis and basketball courts, parking lots, landscaping and subdivision entrances, etc.

Available Factory-Installed Options

- Meter sockets: ring type or ringless, up to 400 amp
- Main and branch breakers or T fuses
- Distribution: copper load centers and panel boards
- Clocks, timers and relays
- Photoelectric cells and controls
- Power receptacles: pin and sleeve, twist lock or straight blade
- Contactors: definite purpose, electrical or mechanically held, IEC and mercury types
- Surge protection and lightning arrestors
- Reserve inlet generator receptacle with interlocked circuit breakers
- Motor starters and relays
- Push button controls
- Thermostat controls, fans and heating strips
- Power blocks and terminal blocks
- Steel, aluminum and plywood backboards
- Transformers
- Interlock devices for circuit breakers
- Available in steel, aluminum (unpainted, painted or anodized) or stainless steel construction with powder-coated finish available in eight standard colors or special-ordered RAL colors
- Available for applications up to 400 amp, 120V, 208V, 240V, 277V, 480V - 1Ø or 3Ø

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

CP3B "ML" Main Load Center Series

CP3B11115A22

Typical Applications

Remote site service for multiple loads.

The **Milbank Main Load Center Commercial Pedestals** are designed to handle the vast majority of all requirements in a standard, stocked configuration.

- No waiting or extra charge
- Units feature a load center with a plug-on, back-fed main breaker
- Load center has 16 positions for the 100 amp pedestals and 24 circuits for the 200 amp pedestals
- Both sizes include sub-feed lugs to allow feeding an external panel

If your application requires turning loads on based on "dusk-to-dawn" requirements, be sure to see the **Milbank Switched Load Center Commercial Pedestal** products on the next page.

Features

These units include everything required for remote site service:

- Type 3R construction
- Expandable: load centers allow for future expansion without costly modifications
- All units feature 200 amp meter socket with optional field-installable fifth terminal kit available
- Optional mounting base can be embedded in concrete for fast, easy installation
- Separate sealable and lockable utility termination section
- Separate sealable and lockable metering section with the option of either a ring-type socket with test/bypass blocks (conforms to EUSERC 308) or a heavy duty ringless socket with lever bypass
- A separate sealable and lockable customer section with a load center for "always on" loads that includes:
 - Main circuit breaker
 - 20 (200 or 125 amp models) or 14 (100 amp models) blank breaker spaces
 - A circuit directory to document configuration

Stocked Pedestals*	Optional Fifth Terminal Kit	Main CB		Load Center Circuits	Meter Socket Type
		Amps	Spaces		
CP3B11115A22	105J	100	1,2	16	Ring type with test / bypass blocks
CP3B12119A22	105J	200	1,2,3,4	24	Ring type with test / bypass blocks
CP3B51115A22	K3865	100	1,2	16	Ringless socket with lever bypass
CP3B52119A22	K3865	200	1,2,3,4	24	Ringless socket with lever bypass

**Note: Chart shows standard, stocked items. Other options and features are available. Contact factory for options details and availability.*

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

CP3B "SL" Switched Load Center Series

CP3B11110A22SL1

Typical Applications

Traffic signals, parking lots, highways & athletic field lighting

The **Milbank Switched Load Center Commercial Pedestals** are designed to not only provide power for various loads, but also to switch specific loads on and off under certain conditions. A photoelectric cell is used for these controlled loads, and an optional time clock is also available.

Features

These units include everything required for remote service:

- Type 3R construction
- Expandable: load centers allow for future expansion without costly modifications
- All units feature 200 amp meter socket with optional field-installable fifth terminal kit available
- Optional mounting base can be embedded in concrete for fast, easy installation
- Separate sealable and lockable utility termination section
- Separate sealable and lockable metering section with the option of either a ring-type socket with test / bypass blocks (conforms to EUSERC 308) or a heavy duty ringless socket with lever bypass
- A separate sealable and lockable customer section with:
 - Control circuit including:
 - PE receptacle, Lexan® window and glare shield
 - Hand-Off-Auto (HOA) switch
 - Contactor controlling a 16-circuit load center for controlled loads
 - Pre-mounted DIN rail and pre-wired connector to add an optional plug-and-play time clock kit for PE on and TC off operation
 - A circuit directory to document configuration
- A load center for "always on" loads that includes a main circuit breaker, a control power circuit breaker, a switched load center main breaker, and 9 (200 amp model) or 11 (100 amp model) blank breaker spaces
- A circuit directory to document configuration

Stocked Pedestals*	Optional Fifth Terminal Kit	Main CB		Contactor Amperage	Meter Socket Type
		Amps	Spaces		
CP3B11110A22SL1	105J	100	1,3	60	Ring type with test / bypass blocks
CP3B12110A22SL1	150J	200	1,2,3,4	100	Ring type with test / bypass blocks
CP3B51110A22SL1	K3865	100	1,3	60	Ringless socket with lever bypass
CP3B52110A22SL1	K3865	200	1,2,3,4	100	Ringless socket with lever bypass

*Note: Chart shows standard, stocked items. Other options and features are available. Contact factory for options details and availability.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

CP3B "400" 400 Amp Series

CP3B1411JB22

Typical Applications

Remote site service for residential and commercial jobsites

The **Milbank 400 Amp Commercial Pedestal** is designed to provide a weather and vandal resistant metered enclosure for various loads and distribution. Each pedestal has been designed to handle a wide range of applications using standard, stocked configurations.

- Choice of a single main breaker or twin service disconnect breakers gives flexibility to the pedestal design.
- Optional distribution with feed-thru lugs below the service disconnect breakers allows the pedestal to handle numerous applications.
- Typical applications include remote homes where the metering is best located at the curb side or other remote area. The pedestal can also provide power to secondary residence, on-site business, workshop, irrigation, lighting, security or other secondary load.
- Available in custom colors to match home or landscaping.

Features

These units include everything required for remote service:

- Type 3R construction
- Main circuit breaker or dual service disconnects
- Expandable: load center units allow for future expansion without costly modifications
- Optional mounting base can be embedded in concrete for fast, easy installation
- Separate sealable and lockable utility termination section with lug termination
- Separate sealable and lockable metering section
- A separate sealable and lockable customer section with a circuit directory and a print pocket to hold all documentation
- Meter socket options include ring type with bypass studs, ringless with heavy duty lever bypass, or K-Type bolt-on

Standard Pedestals*	Optional fifth Terminal Kit	Main CB	Load Center Circuits	Meter Socket Type
CP3B1411JB	N/A	320 amp (400 max)	0	Ring-type with test / bypass studs
CP3B14120B	N/A	2-200 amp	(2) 12 circuit ¹	Ring-type with test / bypass studs
CP3B54120B22	K3865	2-200 amp	(2) 12 circuit ¹	Ringless with lever bypass
CP3B5411JB22	K3865	320 amp (400 max)	0	Ringless with lever bypass

***NOTE:** Chart shows standard, stocked items. Other options and features are available. Contact factory for options details and availability.

Stud utility landing is standard. Lug kits are available from factory.

Units with load centers have (2) #6-250 sub-feed lugs on each load center. (Each load center is 200 amp rated and UL Listed with: Siemens, General Electric and Cutler-Hammer plug-in style circuit breakers.)

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

CP3B "IR" Irrigation Control Series

CP3B111IRASP

Typical Applications

Metered power pedestal for irrigation systems

The **Milbank "IR" Series Commercial Pedestals** are designed to provide a weather and vandal resistant metered enclosure for irrigation controllers. Breakers and a GFI duplex receptacle are provided to power the irrigation controllers supplied by others. A plywood backboard is mounted behind the deadfront door for mounting the irrigation controller. A large plan pocket is mounted inside the customer section door to hold plans and specifications. Light green powder coated steel or stainless steel pedestals are normally in stock.

Features

These units include everything required for remote site service:

- Type 3R construction
- 2 each 20 amp single pole circuit breakers: one breaker for standard 20 amp GFCI receptacle and one breaker for irrigation control circuit
- Large plywood back panel for mounting irrigation controller
- All units feature 200 amp meter socket with optional field-installable fifth terminal kit available
- Optional mounting base can be embedded in concrete for fast, easy installation
- Separate sealable and lockable utility termination section
- Separate sealable and lockable metering section with the option of either a ring-type socket with test / bypass blocks (conforms to EUSERC 308) or a heavy duty ringless socket with lever bypass

STOCKED PEDESTALS*	OPTIONAL FIFTH** TERMINAL KIT	EXTERIOR CABINET	METER SOCKET TYPE
CP3B111IRASP	105J	Steel, light green	Ring-type meter socket with test / bypass blocks
CP3B111IRASS	105J	Stainless steel	Ring-type meter socket with test / bypass blocks

*NOTE: Chart shows standard, stocked items. Other options and features are available. Contact factory for options details and availability.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

CP3B "BBS" Battery Backup Series

CP3B5111TCAWSP1

Typical Applications

Metered emergency uninterrupted power for traffic intersections, wireless, phone and communications equipment, parking lots, camera and security locations

The **Milbank BBS Series Commercial Pedestals** are designed to provide battery backup power for various loads, and to switch specific loads on and off under certain conditions; a photoelectric cell or time clock to control lighting circuits, as an example. Metered and non-metered power distribution options are available. The back-up power pedestal is designed to handle the vast majority of today's back-up power requirements. By using 19" rack design, shelves can be adjusted to accommodate the required batteries and manufactures DC to AC inverters, transfer switches and other related equipment. This design gives the user a wide range of design and configuration options. Complete turnkey, ready to power-up pedestals are offered along with basic units ready to accept batteries and inverters supplied by others.

Features

- Type 3R construction
- 100 through 320 amp meter socket with the option of either a ring type socket (conforms to EUSERC 308) with or without test / bypass blocks or a heavy duty ringless socket with lever bypass
- Separate sealable utility termination compartment
- An isolated separate customer section with service disconnects, power distribution options and power control
- 19" wide rack in customer compartment for easy layout of equipment
- Battery trays
- Thermostat with cooling fan
- Filtered louvers for heat rise flow through ventilation
- Three point door latch (key or pad lockable)

Options

- Manual bypass switch
- Transfer switch for generator power back-up
- Generator inlet receptacles 30A through 200A
- Pad lockable provision for receptacles
- Police access door
- Metered load center distribution
- Non metered load center distribution
- Photo electric controls (for street lighting)
- Time clocks
- HOA switches
- Contactors
- GFI duplex receptacles
- Thermostat for heating control
- Heating pads or elements
- Roll out shelves for batteries
- Surge arrestors and lighting arrestors

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

CP3B "Power Transfer" Series

The **Milbank BBS Series Commercial Pedestals** are designed to provide battery backup power for various loads, and to switch specific loads on and off under certain conditions; a photoelectric cell or time clock to control lighting circuits, as an example. Metered and non-metered power distribution options are available. The back-up power pedestal is designed to handle the vast majority of today's back-up power requirements.

By using 19" rack design, shelves can be adjusted to accommodate the required batteries and manufactures DC to AC inverters, transfer switches and other related equipment. This design gives the user a wide range of design and configuration options. Complete turnkey, ready to power-up pedestals are offered along with basic units ready to accept batteries and inverters supplied by others.

Features

- 120/240V 1Ø3W thru 277/480V 3Ø4W ratings
- Metered or unmetered units
- Choice of EUSERC ring type or ringless meter sockets
- 60 amps thru 400 amp ratings
- UL Listed Type 3R rated
- Pad lockable, isolated utility compartments
- 20 amp GFI convenience receptacle
- Lockable recessed generator receptacle door
- Utility and generator indicator light options
- All stainless steel hardware
- Galvanized steel, aluminum or stainless steel cabinet options
- Custom designs available

Typical Applications

Traffic intersections, cell sites, cable TV, pump and lift stations requiring utility power with backup generator power

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

CP3A "Slimline" Series

13
COMMERCIAL
PEDESTALS

The **Milbank Slimline Series Commercial Pedestals** provide a sleeker, smaller footprint and wireway access on the side of the unit rather than the back, allowing maximum flexibility to place the pedestal in tighter spaces.

Features

- UL Listed as service equipment
- 100 or 200 amps
- Vandal-resistant, secure and attractive design
- Customer compartment with distribution and control equipment with swing dead front door, secured with both a hasp/latch and draw latch outer door
- Utility metering compartment protected with a hinged hood, increasing resistance to meter vandalism
- Small footprint
- Wireway located on left side of pedestal for utility incoming wire, allowing pedestal to be mounted with back very close to a wall (14")
- Available in 12" and 20" widths and 50" and 63" (metered) and 43" (nonmetered) heights
- Includes a print pocket for plans and drawings
- 200 amp main available
- Voltage range: 120V–480V
- Compatible with both ringless and ring-type meter sockets, 4–7 terminals
- Available in any color upon request
- Pedestal mounting base option saves time and labor to install on a cement pad—no anchor bolts required
- Powder-coated G90 galvanized steel, raw, anodized or powder-coated aluminum and stainless steel exterior options

Typical Applications

Roadway lighting and signage, wastewater treatment facilities, parks and landscaping, and any application where physical space is at a premium

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

Specifications Example

Example of Specifications for a Metered Commercial Pedestal

Commercial pedestal shall be type _____

Catalog # _____

Voltage rating : _____(120/240v 1P 3W)_____

SCCR rating: _____10_____

Amperage rating : _____(100 amps)_____

The pedestal shall be of Type 3R rainproof construction and shall be UL Listed. External construction shall comply with UL50 requirements and shall be of G90 galvanized steel with light green #14672 Federal Specification 595 polyurethane industrial grade powder paint of 1.7 mil minimum thickness (unless otherwise specified). Aluminum and stainless steel are other factory options available. Internal construction shall be G90 galvanized steel and 1.7 mil minimum thickness polyurethane industrial grade powder coat painted or bare aluminum. No fasteners except sealing screws shall be removable by external access. Hinges shall be stainless steel and of the continuous piano hinge type.

The pedestal mounting bolts shall not be externally accessible. The pedestal shall be offered with an optional base designed to be embedded in concrete in place of anchor bolts. Either pedestal mounting base or anchor bolt kit is required for installation.

The service pedestal must have three separate isolated sections for metering equipment, utility termination and customer equipment.

The metering section must be pad-lockable and sealable and have a hinged swing back hood

with an integral hinged polycarbonate sealable window for access to demand meters. An external nameplate shall be permanently attached to the hood. A stainless steel handle shall be provided on the front exterior of the hood. Meter socket type shall meet the requirements of the serving utility.

The utility termination section must be pad-lockable and sealable and shall have a stainless steel handle provided on a lift-off cover. Sufficient clearance shall be provided for a 4-inch diameter conduit for utility cables entrance. Utility landing lugs shall accommodate #6 – 350 kcmil conductors.

The customer compartment door to be hinged on the left hand side. A stainless pad-lockable hasp provided to secure customer compartment. A door keeper provided to keep the door in an open position. A print pocket on the inside of the door shall hold all wiring schematics, circuit directories and instructions in a clear, weatherproof sleeve. Required labeling shall be located on the inside of the customer door. Distribution and control equipment shall be behind an internal dead-front door with a quarter-turn securing latch and be hinged to open more than 90 degrees. The dead-front door shall be hinged on the same side as the customer section door. All distribution and control equipment shall be factory wired using 600 volt wire sized to UL requirements.

The provided documentation shall list circuit breaker combinations and those to be used for de-rated operation for series ratings.

Utility requirements for this equipment vary. Always consult the serving utility for their requirements before ordering or installing this equipment.

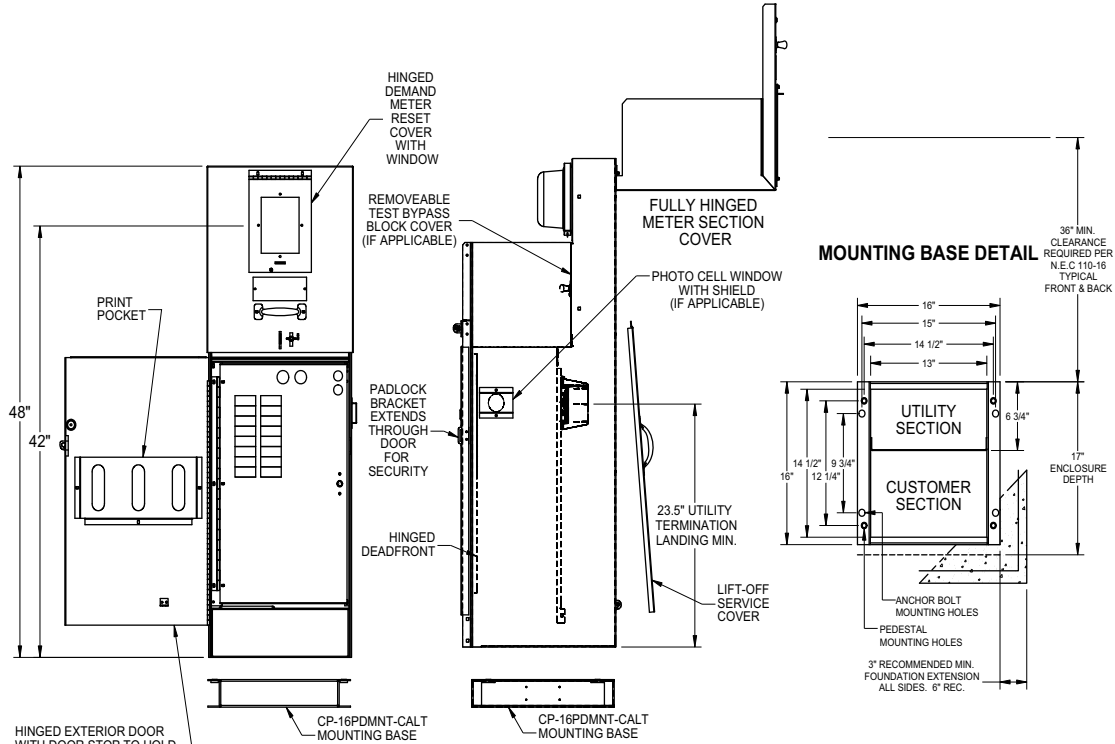

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

16" Metered & Unmetered Drawings

"A" Style 16" Metered Commercial Pedestal

Pad Mount Base or (4) 5/8-11 X 18" Anchor Bolts Recommended

"E" Style 16" Unmetered Commercial Pedestal | Low Profile

Pad Mount Base or (4) 5/8-11 X 18" Anchor Bolts Recommended

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Please send any drawings, plans, specifications, and load/panel board schedules with worksheet.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

Application Examples

Location: Huntington Beach, CA

Description: Wells Fargo ATM parking lot kiosk. Milbank pedestal supplies power for the ATM machine, irrigation controller and overhead lighting. In addition to the power distribution equipment is a isolated compartment for phone company phone lines and equipment. Telco 24 volt equipment must be separated from the high voltage 120 volt equipment. Steel powder painted.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

Application Examples

27

COMMERCIAL
PEDESTAL
APPLICATION
EXAMPLES

Location: Mission Viejo, CA

Description: Pedestal is supplying power for the irrigation and pump control pedestals left of the Milbank pedestal. Also includes walk-way lighting control equipment. Anodized aluminum.

Location: Costa Mesa, CA

Description: Milbank commercial pedestal supplying power for an underground telephone equipment vault. Meter socket, generator receptacle and surge protection are all installed inside this pedestal.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

MILBANK
ENERGY AT WORK

Commercial Pedestals

Application Examples

Location: Lacy, WA

Description: Traffic signal control cabinet next to a Milbank power supply and street lighting control pedestal. Mounted on a raised pad for winter snow conditions. Anodized aluminum.

Location: Cleveland, OH

Description: Milbank pedestals supplied for Rapid Transit Bus Stops providing security and normal lighting. Pedestals looped together for efficiency.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

Application Examples

Location: Interstate 70, MO

Description: Milbank pedestal providing remote distribution for Dynamic Message Signs along I-70 between Kansas City and St. Louis, MO. Operated through MoDOT, these stationary traffic control devices provide travelers with real-time traffic-related messages.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

COMMERCIAL
PEDESTAL
APPLICATION
EXAMPLES

Commercial Pedestals

Application Examples

Location: Manchester, TN

Description: Milbank pedestals used for annual outdoor music and arts festival. Operating in remote farmland, multiple pedestals provide temporary power receptacles for organizer's use. Shown with in-use cover which allows for security and safety for plugs-in-use.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

Application Examples

31

COMMERCIAL
PEDESTAL
APPLICATION
EXAMPLES

Location: Rio Rancho, NM

Description: Battery back-up pedestal. The unit contains an inverter and batteries providing uninterrupted power to traffic signals at a busy intersection in the event of a utility power failure. Milbank pedestal supplies power for the intersection signal heads and control cabinet using utility power and, if necessary, a backup system. The batteries can run the entire intersection traffic lights for 4 hours in full operation mode and an additional 4 hours in flashing mode. Aluminum powder painted tan.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

MILBANK
ENERGY AT WORK

Commercial Pedestals

Application Examples

Location: Anaheim, CA

Description: Disneyland parking lot lighting and control. Two pedestals were provided as customer required both 120 and 480 volts. Steel painted customer-requested green.

Location: Dubuque, IA

Description: Parking lot lighting power and control application. Steel painted black.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

Application Examples

33

COMMERCIAL
PEDESTAL
APPLICATION
EXAMPLES

Location: Kansas City, MO

Description: Zona Rosa Shopping Center.
Multiple pedestal locations throughout shopping area providing street lighting and traffic signal distribution.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

MILBANK
ENERGY AT WORK

Commercial Pedestals

Application Examples

Location: Kansas City, MO

Description: Kansas City International Airport. Multiple pedestal locations providing lighting distribution for rental car facility parking lot.

Location: Anaheim, CA

Description: Milbank pedestal supplying power for the traffic signal cabinet (seen in picture). Pedestal also holds the control equipment for the intersection and roadway street lighting. Anodized aluminum.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Commercial Pedestals

Application Examples

35

COMMERCIAL
PEDESTAL
APPLICATION
EXAMPLES

Location: Louisville, KY

Description: The Parklands of Floyd's Fork multi-phase park project. Provides power and automated controls for area and walkway lighting. Includes receptacles for temporary power for concerts, festivals and other events.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

TYPE 1
SCREW COVER
JUNCTION BOXES

Screw Cover Junction Boxes

Type 1

Application

- Designed for use as a junction box or pull box.
- For indoor use to provide protection against contact with enclosed equipment where moisture and dust are not a problem.

Construction

- Enclosure and cover are manufactured from 16, 14, or 12 gauge G90 steel.
- Available with or without knockouts. Rectangular units have knockouts on all four sides; square units have knockouts on just two sides. For no knockouts, refer to suffix **-NK** in catalog number.
- Available with or without paint. For no paint, refer to suffix **-NP** in catalog number. Unpainted enclosures are made from galvanized steel.
- Covers have teardrop slots for easy installation and are attached to body with plated screws.
- Grounding emboss provided with green plated grounding screw.
- Holes are incorporated into the back of enclosure for mounting.

Finish

- ANSI 61 gray polyester powder coating inside and out unless otherwise specified.

Accessories

- Replacement covers: see Covers, pg. 40
- Touch-up paint: see Accessories, pg. 78.
- Wood back panels: see Panels, pg. 58.
- Replacement screws: see Accessories, pg. 78.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Hinge Cover Junction Boxes

Type 1

41
TYPE 1
HINGE COVER
JUNCTION BOXES

Industry Standards

- NEMA Type 1
- UL 50 Type 1
- CUL Type 1 (Equivalent to CSA)

Application

- Designed for use as a junction or pull box
- For indoor use to provide protection against contact with enclosed equipment where dust and moisture are not a problem.

Construction

- Enclosure made from 16 or 14 gauge steel.
- Available with or without knockouts. For no knockouts, refer to suffix **-NK** in catalog number.
- Available with or without paint. For no paint, refer to suffix **-NP** in catalog number. Unpainted enclosures are made from galvanized steel.
- Formed stainless hinges.
- Mounting holes on back.
- Provision for grounding, with green grounding screw.
- Flush pull ring for easy opening of door.

Finish

- Finish: ANSI 61 gray polyester finish inside and out unless otherwise specified.

Accessories

- Note: Use wood panels only for HC1 enclosures (WB series, pg. 58).
- Touch-up paint: see Accessories, pg. 78.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Hinged Cover Panel Enclosure

Type 1

43
TYPE 1
HINGED COVER
PANEL
ENCLOSURES

Industry Standards

- NEMA Type 1
- UL 50 Type 1
- CUL Type1 (Equivalent to CSA)

Application

- Designed for use in control and instrumentation applications.
- For indoor use in applications where moisture and dust are not a problem.

Construction

- Enclosure and cover manufactured from 16 gauge steel.
- The door is attached to the enclosure with a continuous hinge.
- The door is secured closed by a quarter-turn, screwdriver-operated flush catch.
- Panel mounting studs are provided for optional back panel.
- Provisions for mounting optional cylinder lock.
- Mounting holes are provided on the back of enclosure.

Finish

- ANSI 61 gray polyester powder coating over phosphatized G90 galvanized steel.

Accessories

- Panel nos. listed below: see optional SBP Series pg. 58 for specification information. **Note:** Wood panels are not compatible with these units.
- Touch-up paint: see Accessories pg. 78.
- Locks: see Accessories pg. 77.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Screw Cover Junction Boxes

Type 3R

45
TYPE 3R
SCREW COVER
JUNCTION BOXES

Industry Standards

- NEMA Type 3R
- UL 50 Type 3R
- CUL Type 3R (Equivalent to CSA)

Application

- Designed for use as a junction box or pull box.
- For outdoor use to provide protection against rain, sleet or snow, or indoors where dripping water is a problem.

Construction

- Enclosure and cover are manufactured from 16, 14, or 12 gauge **G90** galvanized steel.
- The cover is designed to fit under the drip shield top, held in place with a plated steel screw.
- Available with or without paint—for no paint refer to suffix **-NP** in the catalog number.
- Boxes are available with or without concentric knockouts on the bottom—for no knockouts refer to suffix **-NK** in the catalog number.
- Mounting embosses are provided on the back of each enclosure.
- Sealing provisions on the front cover.

Finish

- ANSI 61 gray polyester powder coating over phosphatized **G90** galvanized steel.

Accessories

- Replacement cover: see pg. 48.
- Touch-up paint: see Accessories pg. 78.
- Cylinder Lock: see Accessories pg. 77.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Hinged Cover Junction Boxes

Type 3R

49
TYPE 3R
HINGED COVER
JUNCTION BOXES

Industry Standards

- NEMA Type 3R
- UL 50 Type 3R
- CUL Type 3R (Equivalent to CSA)

Application

- Designed for use as a junction box or pull box.
- For outdoor use to provide protection against rain, sleet, or snow, or indoors where dripping water is a problem.

Construction

- Enclosure and cover are manufactured from 16, 14, and 12 gauge G90 galvanized steel.
- Formed steel hinge with padlockable flip latch.

- Available with or without concentric knockouts on the bottom—for no knockouts refer to suffix **-NK** in the catalog number.
- Four mounting holes are supplied on back of box.
- Features a drip shield top and seam-free sides, front and back.

Finish

- ANSI 61 gray polyester powder coating over phosphatized G90 galvanized steel.

Accessories

- Touch-up paint: see Accessories pg. 78.

Hinged Cover Telephone Cabinet

Type 3R

Industry Standards

- NEMA Type 3R
- UL 50 Type 3R
- CUL Type 3R (Equivalent to CSA)

Application

- Designed for use as a telephone cabinet, panel enclosure, or junction box.
- For outdoor use to provide protection against rain, sleet, or snow, or indoors where dripping water is a problem.

Construction

- Enclosure and cover are manufactured from 16, 14, 12, or 11 gauge G90 galvanized steel.
- The cover is mounted on galvanized lift-off hinges with stainless steel hinge pins. Cover is fastened with a padlockable draw latch.
- Panel mounting studs provided for optional back panel.
- Embossed mounting holes on back.
- Knockouts provided on the bottom of the **12126-TC3R** and smaller sizes.
- Drip shield top and seam-free sides, front and back.

Finish

- ANSI 61 gray polyester powder coating over phosphatized **G90** galvanized steel.

Accessories

- Panel: see optional P Series pg. 57.
- Touch-up paint: see Accessories pg. 78.
- T-Handle lock: see Accessories pg. 77.
- External mounting-foot kit: see Accessories pg. 78.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Gasketed Screw Cover Junction Boxes

Type 1, 3, & 12

53

TYPE 1, 3 & 12
GASKETED
SCREW COVER
JUNCTION BOXES

Industry Standards

- NEMA Type 1, Type 3, Type 12
- UL 508 Type 1, Type 3, Type 12
- CUL Type 1, Type 3, Type 12 (Equivalent to CSA)

Application

- Designed for use as a junction box or pull box.
- For indoor or outdoor use to provide protection against dust and moisture.

Construction

- Bodies are made from 14 gauge G90 galvanized steel.
- Covers are made from 16 gauge G90 galvanized steel.
- Body is a single piece of metal with continuous seam welds.
- Captivated stainless steel screws thread into sealed wells.
- Seamless gasket assures water-tight and dust-tight seal.
- Grounding stud on inside back of box.

Finish

- Body: ANSI 61 gray polyester powder coating over phosphatized G90 galvanized steel.
- Cover: painted G90 galvanized steel.

Accessories

- Touch-up paint: see Accessories, pg. 78.

CABINET COVERS

Flush Mount Telephone Cabinet Covers

Type 1

Industry Standards

- NEMA Type 1
- UL 50 Type 1
- CUL Type 1 (Equivalent to CSA)

Application

- Designed for use with the SC1 series enclosures for flush mount telephone cabinet applications.
- For indoor use to provide protection against contact with enclosed equipment where moisture and dust are not a problem.

Construction

- Covers are manufactured from 16, 14, and 12 G90 gauge steel.
- The continuous hinge is made of stainless steel with a stainless steel hinge pin.
- Tumbler lock features slam-latching action on single door (24 wide or less.) Key is removable in unlocked position. Case is zinc-plated steel; lift lever is steel with a dull chrome finish.
- Double door (30 and wider) uses overlapping doors with 3 point latching mechanism.

Ordering Information

- To order a complete telephone cabinet, pick the SC1 enclosure of the appropriate size and match it with the corresponding cover (height and width must match).

Finish

- ANSI 61 gray polyester powder coating over phosphatized G90 galvanized steel.

Accessories

- Plywood panel: furnished by contractor.
- Touch-up paint: see Accessories, pg. 78.

P Series Back Panels

Steel and Wood Options

57
P SERIES
BACK PANELS

Application

- For use in electrical enclosures for mounting electronic controls and equipment.

Construction

- Steel panels are 10 or 12 **G90** gauge steel.
- Wood panels are made from 3/4-inch 7-ply plywood.
- Panel mounting hardware is furnished with all enclosures that accept these panels.

Finish

- Painted White (Steel)
- Unpainted (Wood)

Accessories

- Touch-up paint: see Accessories, pg. 78.

SBP Series Back Panels

Steel and Wood Options

Application

- For use in electrical enclosures for mounting electronic controls and equipment.

Construction

- Steel panels are 16 or 12 **G90** gauge steel and have a white finish.
- Wood back panels are made from ¾-inch 7-ply plywood.
- Panel mounting hardware is furnished with all enclosures that accept these panels.
- No mounting holes in boards

Finish

- Painted white (steel)
- Unpainted (wood)

Accessories

- Touch-up paint: see pg. 78.

NOTE

Do not use wood panels with LC1 enclosures.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

GSC1 Lay-In Wireway

Type 1

59
TYPE 1
LAY-IN
WIREWAY

Industry Standards

- NEMA Type 1
- UL 870 Type 1
- CUL Type 1 (Equivalent to CSA)

Application

- Designed to allow long interrupted runs of electrical wiring in applications where moisture and dust are not a problem.
- All straight sections and fittings are completely open on one side so wires can be laid-in to the wireway.

Construction

- Wireway and cover are manufactured from code **G90** gauge steel.
- Available with or without knockouts. For no knockouts, refer to suffix **-NK** in catalog number.
- Available with or without paint. For no paint, refer to suffix **-NP** in catalog number. Note: Unpainted enclosures are made from **G90** galvanized steel.
- Covers incorporate teardrop slots for easy installation and are attached with plated steel screws.
- Available in six standard sizes: 2.5 x 2.5, 4 x 4, 6 x 6, 8 x 8, 10 x 10 and 12 x 12.
- Wide range of fittings allows for change of direction, junctions, terminations as well as transition from competitors products.

Finish

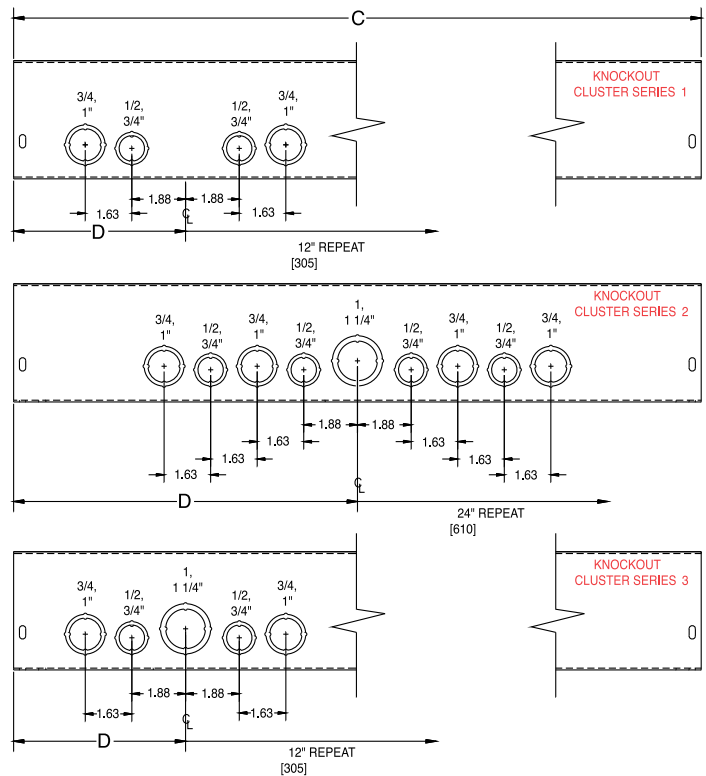

- ANSI 61 gray polyester powder paint coating.

ACCESSORIES

- Replacement covers: see pg. 62.
- Touch-up paint: see Accessories, pg. 78.
- Barrier Kit: see Accessories, pg. 78.

GHC1 Lay-In Wireway

Type 1

63
TYPE 1
LAY-IN
WIREWAY

Industry Standards

- NEMA Type 1
- UL 870 Type 1
- CUL Type 1 (Equivalent to CSA)

Application

- Designed to allow long interrupted runs of electrical wiring in applications where moisture and dust are not a problem.
- All straight sections and fittings are completely open on one side so wires can be laid-in to the wireway.

Construction

- Wireway and cover are manufactured from code gauge steel.
- Available with or without knockouts. For no knockouts, refer to suffix **-NK** in catalog number.
- Available with or without paint. For no paint, refer to suffix **-NP** in catalog number. Note: Unpainted enclosures are made from **G90** galvanized steel.
- Covers incorporate teardrop slots for easy installation and are attached with plated steel screws.
- Available in seven standard sizes, 2.5 x 2.5, 4 x 4, 4 x 6, 6 x 6, 8 x 8, 10 x 10 and 12 x 12.
- Wide range of fittings allows for change of direction, junctions, terminations as well as transition from competitors products.

Finish

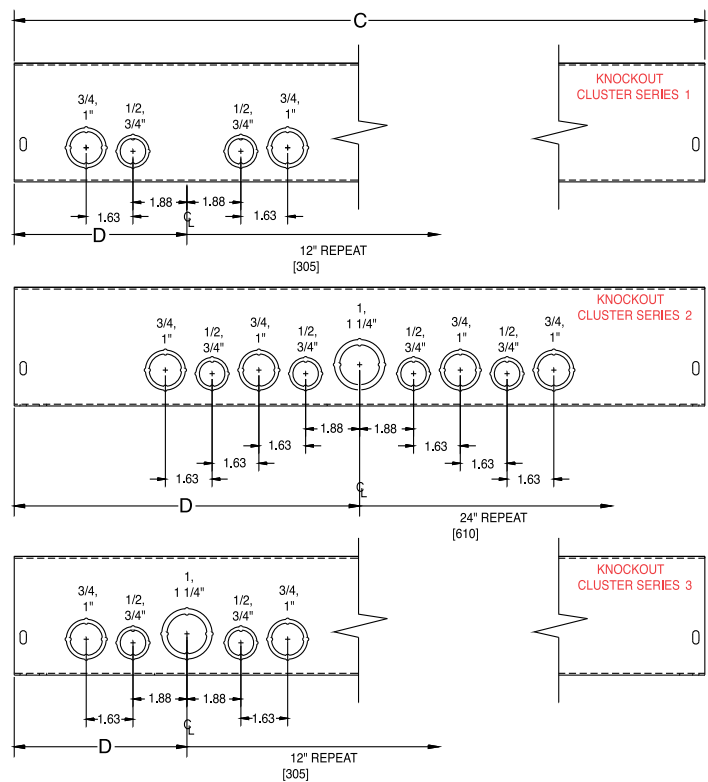

- ANSI 61 gray polyester powder paint coating.

Accessories

- Touch-up paint: see Accessories, pg. 78.
- Barrier kit: see Accessories, pg. 78.

TYPE 3R
SCREW COVER
WIRING TROUGH

GSC3R Screw Cover Wiring Trough

Type 3R

Industry Standards

- NEMA Type 3R
- UL 870 Type 3R
- CUL Type 3R (Equivalent to CSA)

Application

- Designed to protect wiring in outdoor installations against rain, sleet, or snow, or indoors against dripping water.

Construction

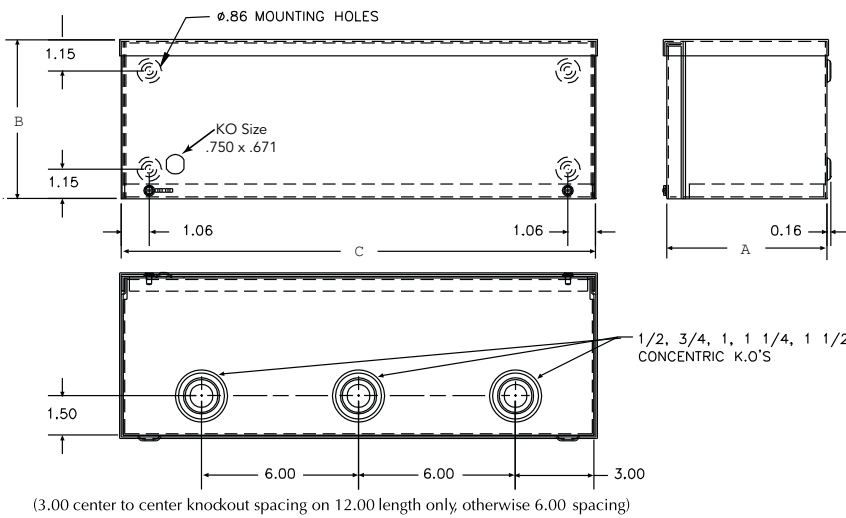

- Trough and cover are manufactured from 16 gauge G90 galvanized steel.
- Available with or without paint. For no paint, refer to suffix **-NP** in the catalog number.
- Cover is designed to fit under the drip shield top, and is held in place with plated steel screws.
- Wireway is available with or without concentric knockouts on the bottom—for no knockouts refer to suffix **-NK** in the catalog number.
- Embossed mounting holes are provided on the backs of the units.

Finish

- ANSI 61 gray polyester powder coating over phosphatized **G90** galvanized steel.

Accessories

- Touch-up paint: see Accessories, pg. 78.
- Locks: see Accessories, pg. 77.

NOTE
These units are UL Listed for horizontal runs only.

Wireway Fittings

For use with GSC1 and GHC1 wireway

GC | Connectors*

A connector is required at each wireway joint (except at telescopic fittings, ends or reducers). The swing portion allows for easy lay-in wiring.

Catalog Number	Product Family	UPC # (7-84572)	Weight (lbs)	Std. Pkg.	Size
22GC	GFIT	26412	0.3	12	2.5 x 2.5
44GC	GFIT	10674	0.5	12	4 x 4
66GC	GFIT	10837	0.6	12	6 x 6
88GC	GFIT	10977	0.8	12	8 x 8
1010GC	GFIT	10047	1	12	10 x 10
1212GC	GFIT	10160	1.44	12	12 x 12

GR | Reducers*

Reduces one size wireway to a smaller size wireway. The inner opening is centered to keep the two wireway sizes relative to each other.

Catalog Number	Product Family	UPC # (7-84572)	Weight (lbs)	Std. Pkg.	Size

Suffix Designations

C | Corner

C Configuration on 90° screw cover elbow

Both inside and outside corners are removable for lay-in wiring.

S | Side

S Configuration on 90° screw cover elbow

Top and bottom are removable for lay-in wiring.

Side Opening | S Configuration on Hinge Cover Elbow

Inside Opening | IS Configuration on Hinge Cover Elbow

Outside Opening | OS Configuration on Hinge Cover Elbow

Interchangeable Fittings

The following fittings are interchangeable between the screw cover and hinge cover wireways:
Connectors, Hangers, End Flanges, 45° Elbows, Crosses, Reducers, Telescopic Fittings.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Wireway Fittings

For use with GSC1 and GHC1 wireway

L45C & L45S | 45° Elbows

Similar to the 90° elbow in design and function, only used in 45° angle applications.

L45C (side access)

L45S (top access)

90° Elbows

These elbows are designed to turn a 90° corner in a wireway run.

90° Elbows (for Screw Covers)*

90° Elbows (for Hinge Covers)*

*Note: Screws not included with fittings. Fitting attachment screws are included with straight sections of wireway.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Hole Seals

Steel and Stainless Steel options

Application

- Designed to seal extra push-button holes, knockout openings and conduit openings from dust, dirt, water and oil.
- A hole seal has a cover with a stud welded in the center and a gasket placed over the stud.

Construction

- **Steel:** Cover is painted ANSI 61 gray. Oil-resistant gasket. Back plate is unpainted galvanized steel.
- **Stainless Steel (-XS):** Cover is stainless steel with a #3 finish. Oil-resistant gasket. Back plate is stainless steel.

Installation

- The cover and gasket are typically placed on the outside of the enclosure, with the backplate and wing nut fastened to the seal from the inside of the enclosure.
- As the wing nut is tight-ened, the cover compresses the gasket and seals the hole. Can be used on holes ranging in size from .19 through 4.00 with a wall thickness of up to .31.

1	Enclosures constructed for indoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment and to provide a degree of protection against falling dirt.	Indoor use primarily to provide a degree of protection against limited amount of falling dirt	General purpose enclosure in ordinary locations.
2	Enclosures constructed for indoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment, to provide a degree of protection against falling dirt, and to provide a degree of protection against dripping and light splashing of liquids.	Indoor use primarily to provide a degree of protection against limited amounts of falling water and dirt.	Enclosure for indoor use, constructed to provide a degree of protection against dripping and light splashing of noncorrosive liquids and falling dirt.
3	Enclosures constructed for either indoor or outdoor use to provide a degree of protection to personnel against incidental contact with enclosed equipment, to provide a degree of protection against falling dirt, rain, sleet, snow and windblown dust and that will be undamaged by the external formation of ice on the enclosure.	Outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust, and damage from external ice formation.	Enclosure for either indoor or outdoor use, constructed so as to provide a degree of protection against rain, snow, and windblown dust; undamaged by the external formation of ice on the enclosure.
3R	Enclosures constructed for either indoor or outdoor use to provide a degree of protection to personnel against incidental contact with enclosed equipment, to provide a degree of protection against falling dirt, rain, sleet, snow and that will be undamaged by the external formation of ice on the enclosure.	Outdoor use primarily to provide a degree of protection against rain, sleet; and damage from external ice formation.	Enclosure for either indoor or outdoor use, constructed so as to provide a degree of protection against rain, and snow, undamaged by the external formation of ice on the enclosure.
4	Enclosures constructed for either indoor or outdoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment, to provide a degree of protection against falling dirt, rain, sleet, snow, windblown dust, splashing water, and that will be undamaged by the external formation of ice on the enclosure.	Indoor or outdoor use primarily to provide a degree of protection against windblown dust, and rain, splashing water, hose-directed water; and damage from external ice formation.	Enclosure for indoor or outdoor use, constructed to provide a degree of protection against rain, snow, windblown dust, splashing and hose-directed water; undamaged by the external formation of ice on the enclosure.
4X	Enclosures constructed for either indoor or outdoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment; to provide a degree of protection against falling dirt, rain, sleet, snow, windblown dust, splashing water, hose-directed water, and corrosion; and that will be undamaged by the external formation of ice on the enclosure.	Indoor or outdoor use primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water, hose-directed water; and damage from external ice formation.	Enclosure for either indoor or outdoor use, constructed so as to provide a degree of protection against rain, snow, windblown dust, splashing and hose-directed water; undamaged by the external formation of ice on the enclosure; resists corrosion.
12	Enclosures constructed (without knockouts) for indoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment; to provide a degree of protection against falling dirt; against circulating dust, lint, fibers and flyings; and against dripping and light splashing of liquids.	Indoor use primarily to provide a degree of protection against circulating dust, falling dirt, and dripping noncorrosive liquids.	Enclosure for indoor use, constructed so as to provide a degree of protection against circulating and settling dust, lint, fibres, and flyings; dripping and light splashing of non-corrosive liquids; no knockouts provided.
13	Enclosures constructed for indoor use to provide a degree of protection to personnel against incidental contact with the enclosed equipment; to provide a degree of protection against falling dirt; against circulating dust, lint, fibers, and flyings; and against the spraying, splashing, and seepage of water, oil, and noncorrosive coolants.	Indoor use primarily to provide a degree of protection against dust, spraying of water, oil, and noncorrosive coolant.	Enclosure for indoor use, constructed so as to provide a degree of protection against circulating and settling dust, lint, fibres, and flyings; seepage and spraying of noncorrosive liquids including oils and coolants.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Definitions of Protection Grades

IEC 529

IEC publication 529, Classification of Degrees of Protection Provided by Enclosures, provides a system for specifying electrical equipment for enclosures on the basis of degree of protection provided by the enclosure. IEC 529 does not specify degrees of protection against mechanical damage of equipment, risk of explosions, or conditions such as moisture (produced for example by condensation), corrosive vapors, fungus or vermin. NEMA Standards Publication 250 does test for environmental conditions such as corrosion, rust, icing, oil and coolants. For this reason, and because the tests and evaluations for other characteristics are not identical, the IEC Enclosure Classification Designations cannot be exactly equated with NEMA Enclosure type Numbers.

The IEC designation consists of the letters IP followed by two numerals. The first characteristic numeral indicates the degree of protection provided by the enclosure with respect to persons and solid foreign objects entering the enclosure. The second characteristic numeral indicates the degree of protection provided by the enclosure with respect to the harmful ingress of water.

The IEC has established an enclosure grading system that produces an IP rating. (For example, IP 54 - 5 is the first character - refer to tables I & II. 4 is the second character - refer to table III - following page).

The following is provided for information only.

Table I: Degrees of Protection against Hazardous Parts

Degree of protection is indicated by the first characteristic numeral

First Characteristic Numeral	Protection of Persons	Protection of Equipment
0	Non Protected	Non-Protected
1	Protected against access to hazardous parts with the back of a hand.	Protected against objects of 50mm diameter and greater.
2	Protected against access to hazardous parts with a finger.	Protected against objects of 12.5mm diameter and greater.
3	Protected against access to hazardous parts with a tool of 2.5mm in diameter and greater.	Protected against objects of 2.5mm diameter and greater.
4	Protected against access to hazardous parts with a wire of 1.0mm in diameter and greater.	Protected against objects of 1.0mm diameter and greater.
5	Protected against access to hazardous parts with a wire of 1.0mm in diameter and greater.	Protected against dust. Ingress of dust is not totally prevented, but dust shall not penetrate in a quantity to interfere with satisfactory operation of the apparatus or to impair safety.
6	Protected against access to hazardous parts with a wire of 1.0mm in diameter and greater.	Protected against dust. No ingress of dust.

Note: In the case of the first characteristic numerals 3, 4, 5 and 6, protection against access to hazardous part is satisfied if adequate clearance is kept. The full diameter of the object probe shall not pass through an opening of the enclosure.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Table II: Degrees of Protection against Water

Degree of protection is indicated by the second characteristic numeral

First Characteristic Numeral	Description	Definition
0	Non-protected	
1	Protected against vertically falling water drops	Vertically falling drops shall have no harmful effects
2	Protected against vertically falling water drops when enclosure tilted up to 15 degrees	Vertically falling drops shall have no harmful effects when the enclosure is tilted at any angle up to 15° on either side of the vertical.
3	Protected against spraying water.	Water sprayed at any angle up to 60° on either side of the vertical shall have no harmful effects.
4	Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effects.
5	Protected against water jets	Water projected in jets against the enclosure from any direction shall have no harmful effects.
6	Protected against powerful water jets	Water projected in powerful jets against the enclosure from any direction shall have no harmful effects.
7	Protected against the effects of temporary immersion in water.	Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is temporarily immersed in water under standardized conditions of pressure and time.
8	Protected against the effects of continuous immersion in water.	Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is continuously immersed in water under conditions which shall be agreed between manufacturer and user but which are more severe than for numeral 7.

NEMA TO IEC Enclosure Rating Cross-Reference¹

NEMA Type	IP23	IP30	IP32	IP55	IP64	IP65	IP66	IP67
1	x							
2		x						
3					x			
3R			x					
4							x	
4X							x	
6								x
12				x				
13						x		

¹This cross reference is an approximation of NEMA and IEC classifications for reference only. Please consult the appropriate JIC agencies for requirements and test qualifications for complete information.

Purge/Pressurization Systems

Purge/pressurization systems allow the use of general-purpose enclosures in hazardous locations as an alternative to NEMA Type 7 or 9 enclosures or those rated for zone classification. Purge/pressurization accessories are attached to an enclosure to prevent explosions in hazardous locations by purging combustible gases or dust and then maintaining a positive pressure with clean dry air, or other inert gas.

Purged and Pressurized Enclosures

1. Purged/pressurized Enclosures for Class I Hazardous Locations Purging is defined as the process of supplying an enclosure with clean air or an inert gas, at sufficient flow and positive pressure to reduce to an acceptable safe level the concentrations of any flammable gases or vapors initially present, and to maintain this safe level by positive pressure with or without continuous flow.
2. Pressurized Enclosures for Class II Hazardous Locations Pressurizing is similar to purging except that pressurizing is used to prevent the entrance of hazardous dusts and cannot be used to clean out dust that already exists inside an enclosure.

Purged or pressurized enclosures are acceptable alternatives for use in hazardous location as permitted by Article 500 of the National Electrical Code and the inspection authority having jurisdiction provided that the requirements and safeguards specified by NFPA 496, "Purged and Pressurized Enclosures for Electrical Equipment in Hazardous Locations" are strictly followed.

Milbank does not supply purged/pressurized enclosures. The above descriptions are provided for information only.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Modification & Drawing Requirements

Milbank Custom Units

83

MODIFICATION
AND DRAWING
REQUIREMENTS

Modification Services

Milbank offers a series of standard options to complement our wide range of catalog products. These options meet common industry and application requirements and are designed to offer a wide range of flexibility to meet many different needs. By utilizing standard catalog enclosure types and standard accessories or options, you can keep your price and delivery times to a minimum.

Wall-Mount Enclosures

- Finish options
- Dimension changes
- Hole and cutout options
- Hinge options
- Studs, nuts and tapped holes
- Sub-panel options
- Ventilation options

- Window options
- Floor mounting options
- Assembled accessories
- Disconnect options
- Special latching

Large Mild Steel Enclosures

- Finish options
- Dimensional changes
- Hole and cutout options
- Component mounting options
- Sub-panel options
- Ventilation options
- Window options
- Floor mounting options
- Hinge options
- Wire management choices
- Structural changes
- Assembled accessories
- Disconnect options
- Special latching

Stainless Steel Enclosures

- Type 304 or 316 stainless
- Hole and cutout options

- Studs, nuts and tapped holes
- Sub-panel options
- Ventilation options
- Window options
- Mounting options
- Drip shields
- Assembled accessories
- Disconnect options
- Hinge options
- Special latching

CAD Drawing Requirements

- Drawings to be AutoCad .DXF or .DWG.
- Provide CAD drawing scaled 1:1 (1" = 1 Drawing Unit / 1mm = 1 Drawing Unit) [Please specify on drawing 'Inch' or 'Metric' accordingly].
- Provide only pertinent information required to modify the enclosure. Electronic/component

layout drawings not required.

Layer Control

- Erase/omit all unnecessary drawing information.
- Turn on/thaw layers in which modifications are necessary (should be only information on drawing).
- Purge all unnecessary blocks / layers / line types / text styles / dimension styles.
- Clearly identify on the drawing, your company name and drawing number.
- Clearly identify revisions

Email Drawings

- Clearly state "Quote request" or "Engineering Drawings" in subject line. Provide brief explanation of revision or change if appropriate.

Minimum Requirements for Engineering/Estimating

1. Clearly specify what you are sending (i.e. Order, RFQ, Information Request, Credit Information or Change).
2. Specify complete customer name, address, city, state, zip.
3. Specify phone and fax number of customer.
4. Specify customer contact.
5. Specify exactly who is to receive a copy of the quote (i.e. Customer/Rep/Both).
6. Specify shipping information.
7. Specify requested ship date. Do not specify ASAP, Rush, or impossible dates.
8. Indicate on repeat orders when a change is taking place. Follow up with Engineering and Estimating to verify change.
9. Specify quantities required and indicate if a blanket order will be placed.
10. Specify part number if item is a repeat.
11. When referencing competitor's part numbers, cross-reference them before submitting RFQ.
12. Clearly describe product including environment (Nema), type, height, width, depth, number of doors, special construction (i.e. shelves, brackets, etc.), description of application is helpful.
13. Clearly specify if UL Environmental rating Labels Are Required. If so, specify type or indicate "none."
14. Clearly specify paint, paint type, paint color, paint part number, paint manufacture, and any special requirements if other than standard.
15. Specify type of finish for stainless enclosures (i.e. brushed, Scotch Brite). Indicate special requirements if other than standard.
16. Specify material requirements (i.e. stainless, mild steel).
17. Indicate if sub-panel is required.
18. When sending drawings, specify clear and complete information.
 - Engineering: specify customer name, job number, and revision if applicable.
 - Estimating: specify customer name and reference RFQ or quote number if applicable.
19. Specify any special requirements (i.e. penalty clauses, accessories, mil specs).

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

MILBANK
ENERGY AT WORK

84

TYPE 12
SCREW COVER
JUNCTION
ENCLOSURES

Screw Cover Junction Enclosures

Type 12 | JIC

Applications

For housing electrical controls, terminals, and instruments and to provide protection from dust, dirt, oil and water

Construction

- Fabricated from 16 or 14 gauge carbon steel, type 304 stainless steel and type 316 stainless steel.
- Lids secured with captivated cover screws threaded into sealed wells.
- Oil resistant gasket applied to the doors.
- External mounting feet for wall or machinery mounting.
- Weld nuts for mounting optional sub panel.
- Chain not included, order as extra.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture

polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless Steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Industry Standards

- UL 50 Listed
- CUL 50 Listed
- Type 12

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

TYPE 12
WIRING
TROUGH
WITH LIFT-OFF
COVERS

Wiring Troughs with Lift-Off Covers

Type 12

Applications

Designed to house electrical wiring where dust, dirt, oil and water are not serious problems.

Construction

- Fabricated from 16 or 14 gauge carbon steel, 14 gauge type 304 or type 316 stainless steel with continuously welded seams.
- No holes or knockouts.
- Troughs with lift-off lids and external screw clamps to ensure a complete seal between cover and body.
- Mounting feet provided.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture

polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Stainless Steel enclosures have a polished #4 finish.

Options

Milbank can modify standard flangeless lay-in wireways according to your specifications. Sizes and many more options are available. Quotations upon request.

NOTE

When width is equal to or less than 8 inches, there will be on set of clamps on that side.

Sub panels must be ordered separately.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Junction Enclosures

Type 12 | Large Continuous Hinge Cover

91
TYPE 12
JUNCTION
ENCLOSURES

Lid Removed

Applications

For housing electrical controls, terminals, and instruments and to provide protection from dust, dirt, oil and water.

Construction

- Fabricated from 14 gauge carbon steel.
- Door secured with continuous hinge and clamps.
- Oil resistant gasket applied to doors.
- External mounting feet for wall or machinery mounting.

- Collar studs for mounting optional sub panel.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon

steel sub panels have a white polyester powder coat finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Notes:

1. Print pocket: 6" x 6" when H and W are 24" or less. Print pocket = 9" x 9" when H and W are greater than 24".
2. Panels will have formed flanges when either Height or Width is greater than or equal to 18".
3. Sub panels must be ordered separately.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Applications

To protect wiring from dust, dirt, oil and water.

Construction

- Fabricated from 14 gauge carbon steel, type 304 or type 316 stainless steel with continuously welded seams.
- No holes or knockouts.
- Troughs have continuous hinges and external screw clamps to ensure a complete seal between cover and body.
- Mounting feet provided.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Stainless Steel enclosures have a polished #4 finish.

Options

Milbank can modify standard Flangeless Lay-in Wireways according to your specifications. Sizes and many more options are available. Quotations upon request.

Pushbutton Enclosures

Type 12 | Standard Oil-Tight

Applications

Designed to provide protection from oil, dirt, and dust. Universal holes accommodate many types of pilot lights, switches and pushbuttons

Construction

- Fabricated from 14 gauge carbon steel or type 304 stainless steel with continuously welded seams.
- Cover secured with captivated screws.
- Oil resistant gasket applied to the cover.
- External mounting feet for wall or machinery mounting.
- Universal pushbutton holes (30.5mm).
- 22mm available with "M" addition to part number.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Custom sizes, materials, and many more options are available. Quotations upon request.

Pushbutton Enclosures

Type 12 | Sloping Front Oil-Tight

99
TYPE 12
PUSHBUTTON
ENCLOSURES

Applications

Designed to provide protection from oil, dirt, and dust. Universal holes accommodate many types of pilot lights, switches and pushbuttons.

Construction

- Fabricated from 14 gauge carbon steel or type 304 stainless steel with continuously welded seams.
- Cover secured with captivated screws.
- Oil resistant gasket applied to the cover.
- External mounting feet for wall or machinery mounting.
- Universal pushbutton holes (30.5mm)
- 22mm available with: M addition to part number.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable,

smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Custom sizes, materials, and many more options are available. Quotations upon request.

Applications

Consolets provide protection from oil, dirt, and dust. They can be mounted on either of two sides, providing a 30 degree or 60 degree inclined control surface. These enclosures can be mounted on machines, pedestals, or desk tops, etc.

Construction

- Fabricated from 14 gauge carbon steel or type 304 stainless steel with continuously welded seams.
- Oil resistant adhesive gasket applied to the cover secured by captivated screws.
- A continuous hinge with a removable hinge pin on the long side.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Stainless steel consolets are polished with a #4 finish on six sides.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications.

Holes, hubs, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Wall Mount Enclosures

Type 12 | Single Door

103

TYPE 12
WALL MOUNT
ENCLOSURES

Applications

Designed to offer protection for electrical controls, instruments, and terminals from dust, dripping liquids, oil, and dirt.

Construction

- Fabricated from 14 gauge carbon steel, type 304, type 316 stainless steel, or .125" 5052 H32 aluminum with continuous welded seams.
- Door secured with heavy-duty continuous hinge with removable hinge pin and clamps.
- Padlocking hasp and staple.
- Adhesive backed, oil resistant gasket applied to the doors.
- Print pocket.
- External mounting feet for wall or machinery mounting.
- Ground studs installed inside cabinet and door.

- Collar studs provided for mounting optional sub panels.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panel have a white polyester powder coat finish. Stainless steel and aluminum enclosures have a polished #4 finish.

Options

Note: Sub panels must be ordered separately. Weights for aluminum enclosures are not listed. Please contact Milbank for weight.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

MILBANK
ENERGY AT WORK

Wall Mount Enclosures

Type 12 | Double Door

Applications

Designed to provide protection for electrical controls, instruments, and terminals from dust, dripping liquids, dirt, and oil.

Construction

- Fabricated from 14 gauge carbon steel, type 304 or type 316 stainless steel with continuous welded seams.
- Overlapping doors secured with continuous hinges with removable hinge pins and key locking handle with three point latching system.
- Adhesive backed, oil resistant gasket applied to the doors.
- Print pocket.
- External mounting feet for wall or machinery mounting.
- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting optional sub panels.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures.

Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless Steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, hubs, cutouts, louvers, sizes, materials, and many more options are available. Quotations upon request.

Industry Standards

- UL 50 Listed
- CUL 50 Listed
- Type 12

SECTION X-X

Note: 9" x 9" Print pocket shipped inside enclosure.

MILBANK
ENERGY AT WORK

Floor Mount Enclosures

Type 12 | Two-Door

Applications

Designed to provide protection for electrical controls, instruments, and terminals from dust, dripping liquids, dirt, and oil.

Construction

- Fabricated from 10 and 12 gauge carbon steel, type 304 or 12 gauge type 316 stainless steel with continuous welded seams.
- Overlapping doors secured with continuous hinges with removable hinge pins and key locking handle with three point latching system.
- Adhesive backed, oil resistant gasket applied to the doors.
- 12-inch floor stands.
- Print pocket.
- Heavy-duty lifting eyes.
- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting

optional sub panels.

- Body stiffeners for extra rigidity.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, louvers, sizes, materials, and

many more options are available. Quotations upon request.

110

TYPE 12
FREESTANDING
ENCLOSURES

Freestanding Enclosures

Type 12 | Single Door & Dual Access

Applications

Designed to provide protection for electrical terminals, controls, and instruments from dirt, dust, dripping liquids, and oil. Freestanding enclosures are designed to accept Unistrut® mounted sub-panels, rack angles or other adjustable mount equipment.

Construction

- Fabricated from 10 and 12 gauge carbon steel, type 304 or type 316 stainless steel with continuous welded seams.
- Doors secured with heavy-duty continuous hinges with removable hinge pins and key locking handle with three point latching system.
- Adhesive backed, oil resistant gasket applied to the doors.
- Unistrut® channel.
- Print pocket.
- Heavy-duty lifting eyes.
- Ground studs inside cabinet and door.
- Collar studs provided for mounting optional sub panel in back.

Accessories

- Sub panels include full size, half-size, side mount, and swing-out panels which can be mounted and adjusted for depth on the horizontal Unistrut® channel. Order sub panels separately.
- Clamping nuts for installing other equipment.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures

according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Type 12 | Two Door & Two Door Dual Access

Applications

Provide protection for electrical terminals, controls, and instruments from dirt, dust, dripping liquids, and oil. Freestanding enclosures are designed to accept Unistrut® mounted sub panels, rack angles or other adjustable mount equipment.

Construction

- Fabricated from 10 and 12 gauge carbon steel, type 304 or 12 gauge type 316 stainless steel with continuously welded seams.
- Doors secured with heavy-duty continuous hinges with removable hinge pins and key locking handle with three point latching system.
- Adhesive backed, oil resistant gasket applied to the doors.
- Unistrut® channel.
- Print pocket.
- Heavy-duty lifting bolts.
- Ground studs inside cabinet and door.
- Body stiffeners for extra rigidity where needed (not applicable for dual access).
- Collar studs provided for mounting

optional sub panel in back.

Accessories

- Sub panels include full size, half-size, side mount, and swing-out panels. Sub-panels can be mounted and adjusted for depth on the horizontal Unistrut® channel. Order sub panels separately.
- Clamping nuts for installing other equipment.
- Center panel supports.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

MULTI-DOOR
ENCLOSURES
WITH SUB
PANELS

Multi-Door Enclosures with Sub Panels

Type 12

Applications

Designed to house electrical controls, terminals and instruments; providing protection from dust, dirt, oil and water.

Construction

- Fabricated from 10 and 12 gauge carbon steel with continuously welded seams.
- Adhesive backed, oil resistant gasket applied to the doors. Overlapping doors which eliminate the need for a center post.
- Each enclosure is equipped with heavy duty lifting eyes, body stiffeners, 3-point padlocking handles, removable print pockets,

provision for fluorescent lighting and mechanical interlock with right hand door serving as master door.

- 5-door will be split into 3-door and 2-door sections to be shipped assembled or separate.
- Sub panels must be listed separately when ordering enclosures.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact

Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Disconnect Enclosures

Type 12 | Wall Mount | Single Door with Handles

Applications

Designed to accommodate Allen-Bradley, Cutler-Hammer, General Electric, Square D, Westinghouse, and Siemens/ITE flange mount disconnect switches and circuit breakers and protect them from dust, dripping liquids, dirt and oil. For disconnect order information see page 122.

Construction

- Fabricated from 14 gauge carbon steel, type 304 or type 316 stainless steel.
- Door is secured with heavy-duty continuous hinge with removable hinge pin.
- Provided with black anodized padlocking handle with defeater mechanism and two or three point latching system.
- Adhesive backed, oil resistant gasket applied to the doors.
- Print pocket.
- External mounting feet for wall or

machinery mounting.

- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting optional sub panels.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. *M12S603712-FD-H, M12XS603712-FD-H, and M12XZ603712-FD-H accept ABV 1494V 400 and 600 amp and ITE 800/1200 amp only.
Note: Sub panels must be listed separately when ordering enclosures.

Notes:

- Print pocket = 6" x 6" when H and W are 24" or less.
Print pocket = 9" x 9" when H and W are greater than 24".
- Panels will have formed flanges when either height or width is greater than 18".
- When H=40" or greater, the handle is centered in the height and includes a three point latch system. When H is less than 40" the handle is at the bottom and includes a two point latch system.

Space Occupied By Disconnects

E = 4.75 when D = 8.00
E = 7.09 when D = 10.00
E = 11.62 when D = 12.00
E = 11.62 when D = 16.00
E = 18.38 for M12S603712-FD-H
Z = Wire Bend Spacing

See charts on pages C59-C64 for "F", "G", and "Z" dimensions which cover space occupied by disconnect and wire bend spacing. Disconnects occupy the space indicated by "E", "F", and "G".

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Disconnect Enclosures

Type 12 | Wall Mount | Single Door without Handles

Applications

Designed to accommodate Allen-Bradley, Cutler-Hammer, General Electric, Square D, Westinghouse, and Siemens/ITE flange mount disconnect switches and circuit breakers and protect them from dust, dripping liquids, dirt and oil. For Disconnect order information see page 122.

Construction

- Fabricated from 14 gauge carbon steel, type 304 or type 316 stainless steel.
- Door is secured with heavy-duty continuous hinge with removable hinge pin.
- Punching available for manufacturers door hardware.
- Adhesive backed, oil resistant gasket applied to the doors.
- Print pocket.
- External mounting feet for wall or machinery mounting.

- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting optional sub panels.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes,

cutouts, sizes, materials, and many more options are available.

Industry Standards

- UL 50 Listed
- CUL 50 Listed
- Type 12

NOTE

These enclosures will not accept Allen-Bradley 1494F and 1494D circuit breaker operators (see page 122).

E = 4.75 when D = 8.00
 E = 7.09 when D = 10.25
 E = 11.62 when D = 12.00
 E = 11.62 when D = 16.00
 E = 18.38 for M12S603712-FD
 Z = Wire Bend Spacing

See charts on pages 138-147 for "F", "G", and "Z" dimensions which cover space occupied by disconnect and wire bend spacing. Disconnects occupy the space indicated by "E", "F", and "G".

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Disconnect Ordering Information

When ordering flange-mounted disconnects from the various manufacturers, be sure to order the necessary items. Each company has a different system, read through the following list of items required and refer to the charts on pages 141–147.

Use a Type 4 disconnect operating handle on the enclosure flange to provide corrosion resistance and maintain the enclosure rating. Items with an (*) preceding them are available from disconnect manufacturer as complete kits.

Allen-Bradley

When using a 1494V disconnect switch, order:

- *1. A disconnect switch with flange mounted operator. (Bulletin 1494V)
- *2. An operating handle (Bulletin 1494V-H1) Note: use (Bulletin 1494V-H2) operating handle when ordering 12WMRH-060-037-012-SDAV enclosure.
- *3. A connecting rod - Use (Bulletin 1494V-RA1) when D = 8.00 [203] or 10.25 [260] - Use (Bulletin 1494V-RA2) when D = 12.00 [305] or 16.00 [406] - Use (Bulletin 1494V-RB2) for 400A or 600A switch on 12WMRH-060-037-012-SDAV enclosure.
- *4. A trailer fuse block kit, if required (Bulletin 1494V)
- *5. A fuse clip kit, if required
6. Line and load connectors, if required

When using a Bulletin 1494V circuit breaker operating mechanism, order:

1. A circuit breaker (C-H/Westinghouse)
2. A circuit breaker operating mechanism (Bulletin 1494V)
3. An operating handle (Bulletin 1494V-H11)
4. A connecting rod - Use (Bulletin 1494V-RA1) when D = 8.00 [203] or 10.25 [260] - Use (Bulletin 1494V-RA2) when D = 12.00 [305] or 16.00 [406]

ABB Controls

When using a disconnect switch, order:

1. A flange-operated switch (fusible or non-fusible)
2. A shaft - Use (DSFHN-12) when D = 8.00 [203], 10.25 [260] or 12.00 [305] -

when D = 16.00 [406] use (DSFHS-17)

3. A handle (DSFGN-HS12)

When using a circuit breaker, order:

1. A circuit breaker (ABB)
- *2. An operating mechanism
- *3. A shaft - Use (FHS-12) when D = 8.00 [203], 10.25 [260] or 12.00 [305] - when D = 16.00 [406] use (FHS-17)
- *4. A handle mechanism (FHN-HS12)

Cutler-Hammer/Westinghouse

When using a Type C361 disconnect switch, order:

- *1. A disconnect switch with an operating mechanism
- *2. An operating handle (C361H1 or C361H3)

When using a Type C371 circuit breaker operating mechanism with a C-H/Westinghouse circuit breaker, order:

1. A circuit breaker
- *2. An operating mechanism
- *3. An operating handle (C361H1 or C361H3)

When using a C-H/Westinghouse circuit breaker with a Type 4/4X Flex Shaft™ handle mechanism, order:

1. A circuit breaker
2. A complete Flex Shaft™ handle mechanism

General Electric

When using a disconnect switch, order:

1. A disconnect switch (Type QMR or QMW)
2. A fuse clip kit or no-fuse kit
3. A flange handle (STDA1 or STDA2)
4. A variable depth operating mechanism

When using a circuit breaker, order:

1. A circuit breaker
2. A flange handle (STDA1 or STDA2)
3. A variable depth operating mechanism

When using a circuit breaker with a Spectra Flex™ cable operator, order:

1. A circuit breaker
2. A flange-mounted handle mechanism
3. A breaker-mounted mechanism
4. An operating cable

I-T-E Siemens

When using a disconnect switch, order:

1. A basic switch (right hand)
2. A fuse or non-fuse kit
3. A flange-mounted handle (FHOHS)
4. Switch operator
5. Cable 36.00 inch

When using a circuit breaker, order:

1. A circuit breaker
2. Pressure wire connectors
3. A flange-mounted handle (FHOH) Note: use (FHOHN) for 12WMRH-060-037-012-SDAV enclosure
4. A circuit breaker operator mechanism
5. An operating cable - standard 36.00 inch for 125A to 600A circuit breakers - 48.00 inch for 800A to 1200A circuit breakers

Square D

When using a Class 9422 disconnect switch, order:

- *1. A disconnect switch with operating mechanism (Class 9422)
- *2. A handle mechanism (Class 9422 Type A-1)

When using a circuit breaker, order:

1. A circuit breaker (Square D)
2. An operating mechanism (Class 9422)
3. A handle mechanism (Class 9422 Type A-1)

When using a Class 9422 Type "T" disconnect switch with a cable mechanism, order:

1. A disconnect switch with operating mechanism (Class 9422, Type T)
2. A handle mechanism (Class 9422 Type A-1)
3. A cable mechanism (Class 9422 CFT_O) 3, 5, or 10 foot

When using a circuit breaker with a cable mechanism, order:

1. A circuit breaker (Square D)
2. A handle mechanism (Class 9422 Type A-1)
3. A cable mechanism (Class 9422 CFT_O) 3, 5, or 10 foot

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Disconnect Enclosures

Type 12 | Wall Mount Single Door | A-B 1494F & D

123
TYPE 12
WALL MOUNT
DISCONNECT
ENCLOSURES

Applications

Designed to accommodate Allen-Bradley 1494F and 1494D flange mount disconnect switches and circuit breakers and protect them from dust, dripping liquids, dirt and oil.

Construction

- Fabricated from 14 gauge carbon steel, type 304 or type 316 stainless steel with continuously welded seams.
- Door secured with heavy-duty continuous hinge with removable hinge pin.
- Provided with black zinc anodized padlocking handle with defeater mechanism and two or three point latching system.
- Adhesive backed, oil resistant gasket applied to the doors.
- Print pocket.
- External mounting feet for wall or machinery mounting.

- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting optional sub panels.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes,

cutouts, sizes, materials, and many more options are available.

*Suitable for 200 amp disconnect switches and 1494F-L only. Note: Sub panels must be listed separately when ordering enclosures.

Space Occupied By Disconnects

E = 3.84 when D = 8.00
 E = 6.75 when D = 10.25
 E = 9.50 when D = 12.00 except for 200A switches
 E = 9.50 when D = 16.00
 E = 10.50 when D = 12.00 for enclosures with 200A switches
 Z = Wire Bend Spacing
 See charts on pages 138-147 for "F", "G", and "Z" dimensions which cover space occupied by disconnect and wire bend spacing. Disconnects occupy the space indicated by "E", "F", and "G".

Notes:

- Print pocket = 6" x 6" when H and W are 24" or less.
Print pocket = 9" x 9" when H and W are greater than 24".
- Panels will have formed flanges when either height or width is greater than 18".
- When H=40" or greater, the handle is centered in the height and includes a three point latch system. When H is less than 40" the handle is at the bottom and includes a two point latch system.

Disconnect Ordering Information

- When using a 1494F disconnect switch, order:
- A disconnect switch (30A, 60A, or 100A)
 - A fuse block adapter, if required
 - Line and load connectors, if required
- [Exception: M12SAB603712-FD enclosure requires one set (1494F-L4) 3-point latching hardware M12SAB603712-FD enclosure will only accept 200A (1494F) disconnect switch. This switch will not fit in any other size.]
- When using a Bulletin 1494D circuit breaker operating mechanism, order:
- A circuit breaker (C-H/Westinghouse)
 - A circuit breaker operating mechanism
 - A slide mechanism

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Disconnect Enclosures

Type 12 | Floor Mount | Double Door Right Flange

125
TYPE 12
FLOOR MOUNT
DISCONNECT
ENCLOSURES

Applications

Designed to accommodate Allen-Bradley, Cutler-Hammer, General Electric, Square D, Westinghouse, and Telemecanique/ITE flange mount disconnect switches and circuit breakers and protect them from dust, dripping liquids, dirt and oil. For ordering information see page 127.

Construction

- Fabricated from 10 gauge carbon steel with continuously welded seams.
- Doors secured with continuous hinges with removable hinge pins.
- Black zinc anodized padlocking handle with built-in defeater mechanism (on the master door only) and three point latching system.
- Adhesive backed, oil resistant gasket applied to the doors.
- Removable center post for easy installation of the sub panel.
- 15-inch floor stands.
- Print pocket.
- Heavy-duty lifting eyes.

- Universal cutout provides mounting for most disconnect operators by using Adapter Kits.
- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting optional sub panels.
- Body stiffeners for extra rigidity where needed.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish.

Options

Milbank can modify standard

enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Disconnect Enclosures

Type 12 | Floor Mount | Double Door Right Flange

127
TYPE 12
FLOOR MOUNT
DISCONNECT
ENCLOSURES

Space Occupied By Disconnects

See charts on pages 138–147 for "F", "G", and "Z" dimensions which cover space occupied by disconnect and wire bend spacing. Disconnects occupy the space indicated by "E", "F" and "G" on disconnect diagrams on the previous page.

All 24.13 [610] deep enclosures include an adjustable size platform which is 6.00 [152] high. The platform is required for mounting the following disconnect devices:

- ABB Controls flange-operated devices
- Cutler Hammer C361 devices
- Cutler Hammer C371 mechanisms which use C371E, F, G, K operating mechanism
- General Electric Type TDA devices
- Square D Class 9422 devices

The platform can be omitted if long connecting rods are ordered.

- For Cutler-Hammer operating mechanisms C371E and C371F, order catalog number C371CS1 connecting rod. For C371G and C371K order catalog number C371CS2 connecting rod.
- For General Electric devices, order catalog number TDSR extended length drive rod
- For Square D devices, order catalog number 9422-R2 extra long operating rod(s). Some devices require two rods.

Disconnect Ordering Information

When ordering flange-mounted disconnects from the various manufacturers, be sure to order the necessary items. Each company has a different system, read through the following list of items required and refer to the charts on pages 141–147. Items with an (*) preceding them are available from disconnect manufacturer as complete kits.

Allen-Bradley

When using a 1494F flange mounted disconnect switch, order:

1. A disconnect switch
2. A fuse block adapter
3. Line and load connectors, if required

When using a 1494D flange-mounted operator for a circuit breaker, order:

1. A circuit breaker (C-H/Westinghouse)
2. A flange mounted operator mechanism

3. A slide mechanism

When using 1494V disconnect switch, order:

- *1. A disconnect switch
- *2. An operating handle
- *3. A connecting rod (long)
- *4. A trailer fuse block kit, if required
- *5. A fuse clip kit, if required
6. Line and load connectors, if required

When using a 1494V circuit breaker operating mechanism, order:

1. A circuit breaker (C-H/Westinghouse)
2. A circuit breaker operating mechanism
3. An operating handle
4. A connecting rod (long)

An optional Allen-Bradley channel support kit is recommended when Allen-Bradley 1494V devices are installed in 72.13 [1829] high enclosures with center post mounted operating handle

ABB Controls

When using a disconnect switch, order:

1. A flange-operated switch (fusible or non fusible)
2. A shaft (DSFHS-12) for 12.13 [305] deep or (DSFHS-17) for 18.13 [457] deep enclosures in 24.13 [610] deep enclosure a platform must be used with shaft
3. A handle (DSFHN-HS12)

When using a circuit breaker, order:

1. A circuit breaker (ABB)
2. An operating mechanism
3. A shaft (FSH-12) for 12.13 [305] deep or (FSH-17) for 18.13 [457] deep enclosures in 24.13 [610] deep enclosure a platform must be used with shaft
4. A handle (FHN-HS12)

Cutler-Hammer/Westinghouse

When using a Type C361 disconnect switch, order:

- *1. A disconnect switch with an operating mechanism
- *2. An operating handle (C361H1 or C361H3)

When using a Type C371 circuit breaker operating mechanism with a C-H/Westinghouse circuit breaker, order:

1. A circuit breaker
- *2. An operating mechanism

- *3. An operating handle

When using a Type SM handle mechanism, order:

1. A circuit breaker
2. A Type SM handle mechanism

When using a C-H/Westinghouse circuit breaker with a Type 4/4X Flex Shaft™ handle mechanism, order:

1. A circuit breaker
2. A complete Flex Shaft™ handle mechanism

General Electric

When using a disconnect switch, order:

1. A disconnect switch (Type QMR or QMW)
2. A fuse clip kit or no-fuse kit
3. A flange handle (STDA1 or STDA2)
4. A variable depth operating mechanism
5. An extended length drive rod, if required

When using a circuit breaker, order:

1. A circuit breaker
2. A flange handle (STDA1 or STDA2)
3. A variable depth operating mechanism
4. An extended length drive rod, if required

An optional General Electric Flange Stiffener Kit (catalog # TDSR) is recommended when General Electric Type TDA devices are installed in 72.13 [1829] high enclosures with operating handle mounted on center post. Use with TDOM1, TDOM2, TDOM3, S100M1A, and S100M3 operating mechanisms.

When using a circuit breaker with a Spectra Flex™ cable operator, order:

1. A circuit breaker
2. A flange-mounted handle mechanism
3. A breaker-mounted mechanism
4. An operating cable

I-T-E Siemens

When using a disconnect switch, order:

- *5. A basic switch (right hand)
- *6. A fuse or non-fuse kit
- *7. A flange-mounted handle (FHOHS)
- *8. Switch operator
- *9. FHOECO36 36.00 inch cable for 12.13 [305] deep enclosures or FHOECO48

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

MILBANK
ENERGY AT WORK

Disconnect Enclosures

Type 12 | Floor Mount | Double Door Right Flange

for 18.13 [457] and 24.13 [610] deep enclosures

When using a circuit breaker, order:

1. A circuit breaker
2. Pressure wire connectors
- *3. A flange-mounted handle
- *4. A circuit breaker operator mechanism
- *5. An operating cable - 36.00 [914] or 48.00 [1219] long cable for 12.13 [305] and 18.13 [457] deep enclosures and 48.00 [1219] cable 24.13 [610] deep enclosures

* These items are available from ITE as a complete mechanism with a 36.00 [914] long cable only. Order items separately when using a 48.00 [1219] operating cable.

Square D

When using a disconnect switch, order:

1. A disconnect switch with operating mechanism
2. A universal handle mechanism
3. A long operating rod, if required

When using a circuit breaker, order:

1. A circuit breaker
2. An operating mechanism
3. A universal handle mechanism

When using a Class 9422 Type "T" disconnect switch with a cable mechanism, order:

1. A disconnect switch with operating mechanism (Class 9422, Type T)
2. A handle mechanism (Class 9422 Type

A-1)

3. A cable mechanism (Class 9422 CFT_O) 3, 5, or 10 foot

When using a circuit breaker with a cable mechanism, order:

1. A circuit breaker (Square D)
2. A handle mechanism (Class 9422 Type A-1)
3. A cable mechanism (Class 9422 CFT_O) 3-, 5-, or 10-foot

An optional Square D Channel Flange Support Kit (catalog # 9422-C1) is recommended when some Square D devices are installed in 72.13 [1829] high enclosures with operating handle mounted on center post.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Heavy-Duty Enclosures

Type 12 | Freestanding Disconnect with Sub Panel

129
TYPE 12
HEAVY-DUTY
ENCLOSURES

Applications

Designed to provide protection for electrical instruments, terminals, and controls from dust, oil, dirt and dripping liquids.

Construction

- Fabricated from 10 gauge carbon steel with continuously welded seams.
- Single or multiple doors secured with continuous hinges and removable hinge pins.
- Black zinc anodized padlocking defeater handle, three point latching system, and overhead mechanical interlock.
- Adhesive backed, oil resistant gasket applied to the doors.
- Print pocket.

- Heavy-duty lifting eyes.
- Ground studs inside cabinet and door.
- Collar studs provided for mounting sub panels. Sub panels are included.
- Body stiffeners for extra rigidity.
- 5-door will be split into 3-door and 2-door sections to be shipped assembled or separate.
- Universal cutout provides mounting for most disconnect operators by using adapter kits.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for

an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Industry Standards

- UL 50 Listed
- CUL 50 Listed
- Type 12

NOTE

Adapter plates must be ordered separately. See page 189 for ordering information.

These units include subpanels.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Space Occupied By Disconnects

Note:

- E = 11.88 [302] when H = 72 [1778]
- E = 17.88 [454] when H = 84 [2134], except 400 Amp or 600 Amp switches
- E = 20.88 [530] when H = 90 [2286], except 400 Amp or 600 Amp switches
- E = 16.43 [417] when H = 84 [2134], 400 Amp and 600 Amp switches only
- E = 19.43 [494] when H = 90 [2286], 400 Amp and 600 Amp switches only

Allen Bradley 1494F only:

- E = 9.88 [251] when H = 72 [1778], except 200 Amp switch
- E = 15.88 [403] when H = 84 [2134], except 200 Amp switch
- E = 18.80 [478] when H = 90 [2286], except 200 Amp switch
- E = 8.56 [217] when H = 72 [1778], 200 Amp switch only
- E = 14.56 [370] when H = 84 [2134], 200 Amp switch only
- E = 17.56 [446] when H = 90 [2286], 200 Amp switch only
- Z = Wire Bend Spacing

See charts on pages 138–147 for “F”, “G”, and “Z” dimensions which cover space occupied by disconnect and wire bend spacing. Disconnects occupy the space indicated by “E”, “F”, and “G”.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

M12FS5D-FD Five Door

Enclosure to have two sections bolted together. Sections to be sealed with gasket and secured with 3/8" bolts.

Open end of Section 1

SECTION A-A

- Notes:**
- 9" x 9" print pocket shipped inside enclosure.
 - 5-door units will be split into 3-door and 2-door sections to be shipped assembled or separate.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Modular Enclosures

Type 12

135
TYPE 12
MODULAR
ENCLOSURES

Applications

Modular enclosures can be bolted together in any desired arrangement. This design provides maximum versatility; enclosures can be added or removed as required. Modular disconnect enclosures have provisions for flange mount disconnects on right-hand side.

Construction

- Fabricated from 10 gauge carbon steel with continuously welded seams.
- Doors secured with heavy gauge lift off hinges.
- Black zinc anodized padlocking handle with built-in defeater mechanism (on the master door only) and three point latching system.
- Each enclosure has a mechanical interlock so all doors can be interlocked with the master door.
- Adhesive backed, oil resistant gasket applied to the doors.
- Removable center post for easy installation of the sub panel (two door only).
- Print pocket.
- Heavy-duty lifting eyes.
- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting sub panel.
- Panel supports are provided to support panels and aid in panel installation.
- Body stiffeners for extra rigidity where needed.

Accessories (Sold Separately)

- End Plate: not included with enclosures. See page 189 in accessories section for ordering

information. Gasket material and bolts are included with each end plate.

- Flat End Plates: Can be used as barriers between enclosures. See page 185 in accessories section for ordering information.
- Adaptor kits.
- Gasket kit: Required at each joint between modular enclosures. Includes parts needed to connect the interlock system between adjacent enclosures.

Single & Two Door Disconnect

The cutouts for the disconnect operation are located on the right flange and the right side is closed (left side open) so the disconnect operator cannot be obscured by a door. The heavy-duty overhead mechanical interlocking system is factory tested and provides quick, effective assembly of up to 5 doors in a row, controlled by a single master door. When the master door is opened, the interlock is automatically released, permitting all doors to be opened in any order. All doors can be closed in any order.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Space Occupied By Disconnects

See charts on pages 138–147 for "F", "G", and "W" dimensions which cover space occupied by disconnect and wire bend spacing. Disconnects occupy the space indicated by "E", "F" and "G" on disconnect diagrams on the previous page.

All 24.13 [610] deep enclosures include an adjustable size platform which is 6.00 [152] high. The platform is required for mounting the following disconnect devices:

- ABB Controls flange-operated devices.
- Cutler Hammer C361 devices.
- Cutler Hammer C371 mechanisms, which use C371E, F, G, K operating mechanism.
- General Electric Type TDA devices.
- Square D Class 9422 devices.

The platform can be omitted if long connecting rods are ordered.

- For Cutler-Hammer operating mechanisms C371E and C371F order catalog number C371CS1 connecting rod. For C371G and C371K order catalog number C371CS2 connecting rod.
- For General Electric devices, order catalog number TDSR extended length drive rod.
- For Square D devices, order catalog number 9422-R2 extra long operating rod(s). Some devices require two rods.

Disconnect Ordering Information

When ordering flange-mounted disconnects from the various manufacturers, be sure to order the necessary items. Each company has a different system, so care is required. Order the following items from the disconnect manufacturer.

Key to Symbols

Items available from disconnect manufacturer as complete kits. Please note:

1. The "Space Occupied/Available Wiring Space" tables on following pages are based upon information supplied by disconnect manufacturers. Milbank does not assume responsibility for the accuracy of these dimensions.
2. This information is subject to change without notice. Please contact Milbank for the disconnect manufacturer if there are questions.

Allen-Bradley

When using a 1494F flange mounted disconnect switch, order:

1. A disconnect switch.
2. A fuse block adapter.
3. Line and load connectors, if required

When using a 1494D flange-mounted operator for a circuit breaker, order:

1. A circuit breaker (C-H/Westinghouse)
2. A flange mounted operator mechanism
3. A slide mechanism

When using 1494V disconnect switch, order:

- *1. A disconnect switch
- *2. An operating handle
- *3. A connecting rod (long)
- *4. A trailer fuse block kit, if required
- *5. A fuse clip kit, if required
6. Line and load connectors, if required

When using a 1494V circuit breaker

operating mechanism, order:

1. A circuit breaker (C-H/Westinghouse)
2. A circuit breaker operating mechanism
3. An operating handle
4. A connecting rod (long)

ABB Controls

When using a disconnect switch, order:

1. A flange-operated switch (fusible or non-fusible)
2. A shaft (DSFHS-17) for 18.13 [457] deep enclosures (DSFHS-22) for 20.13 [511] deep enclosures in 24.13 [613] deep enclosure a platform must be used with shaft
3. A handle (DSFHN-HS12)

When using a circuit breaker, order:

1. A circuit breaker (ABB)
2. An operating mechanism
3. A shaft (FSH-17) for 18.13 [457] deep or (FSH-22) for 20.13 [511] deep enclosures in 24.13 [613] deep enclosure a platform must be used with shaft
4. A handle (FHN-HS12)

Cutler-Hammer/Westinghouse

When using a Type C361 disconnect switch, order:

- *1. A disconnect switch with an operating mechanism
- *2. An operating handle (C361H1 or C361H3)

When using a Type C371 circuit breaker operating mechanism with a C-H/Westinghouse circuit breaker, order:

1. A circuit breaker
- *2. An operating mechanism
- *3. An operating handle

When using a Type SM handle mechanism, order:

1. A circuit breaker
2. A Type SM handle mechanism

When using a C-H/Westinghouse circuit breaker with a Type 4/4X Flex Shaft™ handle mechanism, order:

1. A circuit breaker
2. A complete Flex Shaft™ handle mechanism

General Electric

When using a disconnect switch, order:

1. A disconnect switch (Type QMR or QMW)
2. A fuse clip kit or no-fuse kit
3. A flange handle (STDA1 or STDA2)
4. A variable depth operating mechanism
5. An extended length drive rod, if required

When using a circuit breaker, order:

1. A circuit breaker
2. A flange handle (STDA1 or STDA2)
3. A variable depth operating mechanism
4. An extended length drive rod, if required

When using a circuit breaker with a Spectra Flex™ cable operator, order:

1. A circuit breaker
2. A flange-mounted handle mechanism
3. A breaker-mounted mechanism
4. An operating cable

I-T-E Siemens

When using a disconnect switch, order:

1. A basic switch (right hand)
2. A fuse or non-fuse kit
- *3. A flange-mounted handle (FHOHS)
- *4. Switch operator
- *5. FHOECO48 cable

When using a circuit breaker, order:

1. A circuit breaker
2. Pressure wire connectors

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Disconnect Information

Multi-Door and Modular Enclosures

- *3. A flange-mounted handle
- *4. A circuit breaker operator mechanism
- *5. An operating cable - 36.00 [914] or 48.00 [1219] long cable for 18.13 [460] and 20.13 [511] deep enclosures and 48.00 [1219] cable 24.13 [610] deep enclosures

*These items are available from ITE as a complete mechanism with a 36.00 [914] long cable only. Order items separately when using a 48.00 [1219] operating cable.

Square D

When using a disconnect switch, order:

1. A disconnect switch with operating mechanism
2. A universal handle mechanism
3. A long operating rod, if required

When using a circuit breaker, order:

1. A circuit breaker
2. An operating mechanism
3. A universal handle mechanism
4. A long operating rod, if required

When using a Class 9422 Type "T" disconnect switch with a cable mechanism, order:

1. A disconnect switch with operating

- mechanism (Class 9422, Type T)
2. A handle mechanism (Class 9422 Type A-1)
3. A cable mechanism (Class 9422 CFT_O) 3, 5, or 10 feet

When using a circuit breaker with a cable mechanism, order:

1. A circuit breaker (Square D)
2. A handle mechanism (Class 9422 Type A-1)
3. A cable mechanism (Class 9422 CFT_O) 3-, 5-, or 10-feet

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

0: Will fit enclosure. No special restrictions.

1: Do not use in 8" deep enclosures.

6: Only fit enclosures with the AB designator at the end of the part number.

7: Only fit enclosures 12.00 inches deep.

8: Do not use in 60" high enclosures.

- 0: Will fit enclosure. No special restrictions.
- 1: Do not use in 8.00 inch deep enclosures.
- 2: Do not use with 8.00 or 10.00 inch deep enclosures.
- 8: Do not use in 60.00 inch high enclosures.
- 9: Do not use in 60.00 or 72.00 inch high enclosures.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Series 1 and Series 9 Consoles

Type 12

M12SP1 Single Door

M12SP1 Double Door

M12SP-924 Single Door

Applications

Designed to house electrical controls, instruments, and components. Pushbuttons, pilot lights, meters, switches, etc. can be mounted on the sloping control panel or on the instrument panel.

Construction

- Fabricated from 14 gauge carbon steel with continuously welded seams.
- Doors and exterior panels have oil resistant gaskets and are secured by three point latches with key locking handles.
- The 24" and 36" consoles have a single door on the front. The door surfaces are flush with the front to the body.

- Each console has a large sloping control panel hinged along the bottom edge and secured with captivated panel screws thread into sealed wells for a good secure fit.
- Stops are provided to hold the control panel open.
- Collar studs provided for mounting optional sub panels.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over

cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

151
TYPE 4 & 4X
SCREW COVER
JUNCTION
ENCLOSURES

Applications

For housing electrical controls, terminals, and instruments and to provide protection from dust, dirt, oil and water

Construction

- Fabricated from 16 or 14 gauge carbon steel, type 304 stainless steel and type 316 stainless steel.
- Lids secured with captivated cover screws threaded into sealed wells.
- Oil resistant gasket applied to the doors.
- External mounting feet for wall or machinery mounting.
- Weld nuts for mounting optional sub panel.
- Chain not included, order as extra.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture

polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless Steel enclosures have a polished #4 finish.

Options

TYPE 4
WALL MOUNT
ENCLOSURES

Applications

Designed to protect electrical controls, instruments, and/or terminals in certain outdoor applications or wet areas, where regular hosing down with water is standard procedure.

Construction

- Fabricated from 14 gauge carbon steel, type 304, type 316 stainless steel or .125" 5052 H32 aluminum with continuously welded seams.
- Door is secured with heavy-duty continuous hinge with removable hinge pin and stainless steel clamps.
- Padlocking hasp and staple.
- Adhesive backed, oil resistant gasket applied to the doors.
- Print pocket.
- External mounting feet for wall or machinery mounting.
- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting

optional sub panels.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat finish available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel and aluminum enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Notes:

1. Print pocket = 6" x 6" when H and W are 24" or less.
Print pocket = 9" x 9" when H and W are greater than 24".
2. Panels have formed flanges on all four sides when Height or Width is equal to or greater than 18".
3. On 12" wide enclosures, center of mounting foot to edge of enclosure is 1.25".
4. Units must be mounted vertically to maintain a NEMA 4 rating.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Notes:

1. Print pocket = 6" x 6" when H and W are 24" or less.
Print pocket = 9" x 9" when H and W are greater than 24".
2. Panels have formed flanges on all four sides when Height or Width is equal to or greater than 18".
3. On 12" wide enclosures, center of mounting foot to edge of enclosure is 1.25".
4. Units must be mounted vertically to maintain a NEMA 4 rating.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

MILBANK
ENERGY AT WORK

Floor Mount Enclosures

Type 4 & 4X | Double Door

Application

Designed to house electrical controls and instruments in a variety of environments, including wet environments.

Construction

- Fabricated from 10 and 12 gauge carbon steel, type 304 or 12 gauge type 316 stainless steel with continuously welded seams.
- Doors are secured with continuous hinges with removable hinge pins, and clamps and screws.
- Padlocking hasp and staple.
- Adhesive backed, oil resistant gasket applied to the doors.
- 12-inch floor stands.
- Print pocket.
- Heavy-duty eyes.
- Ground studs inside cabinet and door.
- Collar studs provided for mounting optional sub panels.
- Removable center post for easy

installation of the sub panel.

- Body stiffeners for extra rigidity.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations

upon request.

FLOOR MOUNT
ENCLOSURES

SECTION B-B

Note: Maximum between door clamps is 16.84" (center to center).

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Freestanding Enclosures

Type 4 & 4X | Single Door

Applications

Designed to house electrical and electronic controls, instruments and components in areas which may be hosed down. Hold-down clamps on top, bottom and open side of door for maximum dust and moisture-proof protection.

Construction

- Fabricated from 12 gauge carbon steel, type 304 or type 316 stainless steel with continuously welded seams.
- Doors are secured with heavy-duty continuous hinges with removable hinge pins and clamps and screws on three sides.
- Adhesive backed, oil resistant gasket applied to doors.
- Unistrut® channel.
- Print pocket.
- Heavy-duty lifting eyes.
- Ground studs inside enclosure and door.
- Collar studs provided for mounting optional sub panel in back.

Accessories (ordered separately)

- Sub panels include full size, half size, side mount and swing out panels can be mounted and adjusted for depth on the horizontal Unistrut® channel.
- Clamping nuts for installing other equipment.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes,

cutouts, sizes, materials, and many more options are available. Quotations upon request.

Disconnect Enclosure

Type 4 & 4X | Wall Mounted | Single Door

Application

For use in the same locations as Milbank's standard NEMA 4 enclosures. For Disconnect order information see page 122.

Construction

- Fabricated from 14 gauge carbon steel, type 304 or type 316 stainless steel.
- Door is secured with heavy duty continuous hinge with removable hinge pin.
- Stainless steel clamps and screws on remaining three sides.
- Adhesive backed oil resistant gasket applied to doors.
- Print pocket.
- External mounting feet for wall or machinery mounting.
- Ground studs installed inside door and cabinet
- Collar studs provided for mounting optional sub panels.
- Furnished with holes in right flange for mounting of operating handle or

mechanism.

- Padlock provision

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Disconnect Enclosure

Type 4 & 4X | Wall Mounted | Single Door

165

TYPE 4 & 4X
WALL MOUNTED
DISCONNECT
ENCLOSURE

Notes:

1. Print pocket = 6" x 6" when H and W are 24" or less. Print pocket = 9" x 9" when H and W are greater than 24".
2. Panels will have formed flanges when either Height or Width is greater than 18".
3. Maximum spacing between door clamps is 16.84" (center to center).

Space Occupied by Disconnects

- E : 8.62 when $D = 8.00$
- E : 11.62 when $D = 12.00$
- Z : Wire Bend Spacing

See charts on pages 138–147 for "F", "G", and "Z" dimensions which cover space occupied by disconnect and wire bend spacing. Disconnects occupy the space indicated by "E", "F", and "G".

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Applications

Designed to house electrical controls, terminals and instruments; providing protection from dust, dirt, oil and water.

Construction

- Fabricated from 14 gauge carbon steel, type 304 or 316 stainless steel.
- Strong and rigid construction.
- All seams continuously welded.
- No holes or knockouts provided.
- Rolled lip around all sides of enclosure opening to increase strength and help keep dirt and liquids out when the door is open.
- A 14 gauge carbon steel, 14 gauge type 304 stainless steel, or 12 gauge type 316 stainless steel frame with mounting holes extends completely around enclosure.
- Collar studs provided for mounting optional sub panels.
- Door is secured with concealed lift-off hinges and slotted ¼ turn latches.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub panels have a white polyester powder coat finish. Stainless steel enclosures have a polished #4 finish.

Application

Designed to house electrical controls, instruments, and terminals in a variety of environments, including wet environments.

Construction

- Fabricated from 14 gauge carbon steel, type 304 or type 316 stainless steel with continuously welded seams.
- Minimum width trough shaped body flange and hidden hinge design providing full 180 degree door opening while excluding liquids and contaminants.
- Door is secured with concealed lift-off hinges and slotted quarter-turn latch. Standard quarter turn latches can be replaced with a variety of optional latches.
- Adhesive backed, oil resistant gasket applied to the doors.
- Print pocket.
- Holes are provided for wall or machinery mounting, options include

bolt-on or weld-on mounting feet.

- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting optional sub panel.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Carbon steel sub-panels are finished with a white polyester powder coating. Stainless steel enclosures have a polished #4 finish.

Application

Designed to house electrical controls, instruments, and terminals in a variety of environments, including wet environments.

Construction

- Fabricated from 14 gauge type 304 or type 316 stainless steel.
- Minimum width trough shaped body flange and hidden hinge design providing full 180 degree door opening while excluding liquids and contaminants.
- Door is secured with concealed lift-off hinges and slotted quarter-turn latches. Standard quarter-turn latches can be replaced with a variety of optional latches.
- Adhesive backed, oil resistant gasket applied to the doors.

- Print pocket.
- Holes are provided for optional wall or machinery mounting.
- Ground studs installed inside cabinet and door.
- Collar studs provided for mounting optional sub panels.

Finish

Stainless steel enclosures have a polished #4 finish. Carbon steel sub panels have white polyester powder coat finish.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Industrial Enclosure Accessories

Drip Shield Kits

Drip Shield Kits

Drip shield kits are designed to protect enclosures from dust and dripping water. They are fabricated from 14 gauge carbon steel with standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. They are also available in type 304 and type 316 stainless steel. Stainless steel drip shield kits have a polished #4 finish. They are attached with stainless steel screws and neoprene washers.

Note: Standard drip shield kits are packaged for field installation using common hand tools. Drip shield kits can also be welded on at the factory. Standard enclosures can be converted to UL 3R when drip shield kits and drain holes are installed at the factory.

Floor Stand Kits

Floor stand kits for Type 4 & 12 enclosures are designed to convert wall mounted enclosures to floor standing enclosures. These kits consist of two stands which may be bolted onto the bottom of the enclosure in the field or welded on at the factory. These kits are fabricated from a heavy gauge carbon steel with a standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Type 304 and type 316 stainless steel is available. Stainless steel floor stand kits have a polished #4 finish. Special heights, depths, and many other options can also be provided. Quotations are available upon request.

Industrial Enclosure Accessories

Door Stop Kits, Rack Mounting Angle Kits, Paint

Door Stop Kits

Door stop kits are for use on standard Type 4 and 12 enclosures to hold the doors open. These door stop kits are designed for use on the top or bottom of a horizontally swinging door of 16 inches wide or wider. Fixed door stop kits provide a 90 degree door swing. Adjustable door stop kits provide door swing adjustment up to 120 degrees by means of a wing nut. The stop arm on both fixed and adjustable kits swings out of the way when the door is closed. Kits are available in carbon or stainless steel. Carbon steel kits are zinc plated.

Catalog Number	Description
A-DSK	Heavy Duty Adjustable - Carbon Steel
A-DSKXS	Heavy Duty Adjustable - 304 Stainless Steel
A-DSKXZ	Heavy Duty Adjustable - 316 Stainless Steel

Rack Mounting Angle Kits

Available in pairs and include all required hardware. Used to mount 19" rack mounted equipment in freestanding enclosures. Use clip nut package (20 pc included) to provide tapped holes at desired locations. Rack angles are available as shown, or in L-angle style upon request. Additional clip nuts can be provided upon request. These items are custom-made; please specify height and material.

Touch-Up Paint

Used to repair the finish of enclosures and panels. Furnished in 12 oz. spray cans.

Catalog Number	Description	Ship. Weight (lbs.)
A-WP	White	1
A-GP	ANSI-61 Grey	1
A-GP7035	RAL-7035	1

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Industrial Enclosure Accessories

Replacement Print Pockets

Replacement Print Pocket

Designed for print storage on the interior of an enclosure. Intended for use as a replacement or as an additional print pocket. Standard Print pockets are made of gray Polystyrene with self-adhesive provided for mounting on enclosure. Print Pockets fabricated from 14 gauge carbon steel with white polyester finish.

Industrial Enclosure Accessories

Folding Shelves

Folding Shelf

Support instruments and test equipment that are used to install and maintain electrical components in an enclosure. Also ideally suited for supporting programmers, monitoring units and other equipment used with programmable controllers. Shelf locks in lower and upper positions.

The shelf can be installed on the inside or outside surface of larger enclosures. All parts are made of heavy gauge carbon steel with a standard ANSI-61 gray finish on interior and exterior of enclosures.

Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Stainless steel construction is available upon request.

Maintains UL Type 4 and Type 12 if properly installed in a Milbank enclosure.

Note: When installing folding shelf to inside of enclosure doors, it is recommended to also install a door stop kit.

Catalog Number	Description	Size (inch)	
		W	D

MILBANK
ENERGY AT WORK

Louver Skirt Kits

Louver skirt kits are fabricated from 14 gauge carbon steel with a standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. 14 gauge type 304 and type 316 stainless steel are available with a polished #4 finish. They are designed to restrict access to any connections but still provide ventilation of any waste gases.

These kits can be easily installed in the field by drilling holes in the floor stand kits and bolting louver skirt to floor stand kit. Hardware is furnished for mounting.

Kit includes:

2 skirts, hardware to install to enclosure. See A-SPSKTB for skirt kits with bug screen. Vandal proof design, custom sizes, and features provided upon request.

Note: Add the letter "B" after the letter "T" in the part number when ordering louver skirt kits with a bug screen (Ex: **A-SPSKTB636**)

Bug screen frame will be wrapped with wire mesh and bolted to the louver skirt.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Industrial Enclosure Accessories

Louver Plate Kits

Louver Plate Kits

Designed to provide ventilation in enclosures where excessive internal heat or moisture is a problem.

These kits can be easily installed in the field by making a cutout of the proper size and attaching the louver plate in place. Louver plates are made from heavy gauge carbon steel, type 304 or type 316 stainless steel. Carbon louver plates have a standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Stainless steel plates have a polished #4 finish. Hardware is furnished for mounting.

Custom sizes, etc., can be provided on special order. Louvers can also be punched in enclosure at the factory. Louvers used in UL Type 1 or 3R enclosures will maintain UL rating. Additional sizes available upon request. Louver can also be factory installed (pressed in).

Window Kits

These kits are easily installed by making a cutout in the enclosure and attaching the window and frame in place (hardware furnished). Frames are made from heavy gauge carbon steel and have a standard ANSI-61 gray finish on interior and exterior of enclosures. Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Type 304 and type 316 stainless steel are available with a polished #4 finish.

The window is scratch-resistant 1/4" Thermoplastic. Oil-resistant gasket ensures a tight seal around the perimeter of the window and frame. All mounting hardware is furnished. Custom sizes and materials can be provided on special order. Consult factory for information. Tinted glass and safety glass are available upon request.

Note: Required cutout size for enclosure is $H + 1.6875" \times W + 1.6875"$

Industrial Enclosure Accessories

Replacement and Custom Handles

Replacement Handles

The replacement handles shown on this page are standard features on Milbank Enclosures and can be ordered separately.

Euro-Design Padlocking Handle

- Made of black zinc die cast.
- Available in compact and heavy-duty style.
- Available with or without defeater mechanism.
- Used for UL Type 12.
- Suitable for three point latching systems.
- Custom inserts are available.
- Compact is the replacement for A-ABN12 enclosures.
- Heavy duty is the replacement for Type 12 floor mount, Type 12 modular and Type 12 freestanding enclosures families.

Catalog Number	Description
A-HNDLCOMP	Compact with defeater
A-HNDLHD	Heavy duty
A-HNDLHDD	Heavy duty with defeater

Note: Cams are ordered separately.

Heavy Duty Keylocking Handle

- Made of black zinc die cast with key included.
- Standard replacement handle for Freestanding enclosures.
- Used for three point latching systems.
- Maintains UL Type 12 enclosure ratings.
- Includes handle only.

Catalog Number	Description
A-HNDLHDK	Heavy duty keylocking handle

Note: Cams are ordered separately.

Custom Handles

These handles can be used in three point latching systems and will maintain the enclosures UL rating. Factory installation is recommended. These handles can be used on special enclosures as an option. Call for availability.

Light Duty Quarter-Turn Handles

- Available in black polymide, black zinc die cast, or chrome.
- Suitable for three point UL Type 12 latching systems.
- Specify material when ordering.

Catalog Number	Description
A-HNDLLNLSS	Non-locking stainless steel
A-HNDLKLBLK	Keylocking black zinc die
A-HNDLKLCHR	Keylocking chrome
A-THNDLKLCHR	T-Type keylocking chrome

Note: Cams are ordered separately.

Type 304 Stainless Steel Heavy Duty Padlocking Handle

- Made of stainless steel.
- Suitable for three point latching systems where enhanced corrosion resistance is required.
- Suitable for UL Type 12 applications.

Catalog Number	Description
A-HNDL-HDSSPAD	Stainless steel padlock handle

Note: Cams are ordered separately.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Industrial Enclosure Accessories

Replacement and Custom Latches & Clamps,
Replacement Handle Kits

Replacement Latches & Clamps

The replacement latches and clamps shown on this page are standard features on Milbank Enclosures and can be ordered separately.

Quarter Turn Slotted Latch

Standard Elite UL Type 4, 4X, 12 and 13 enclosures only. Made of black polyimide. Allows for a maximum of 26 inch spacing between latches.

Catalog Number	Description
A-R002-100BLK	Black Polyimide
A-R090-100SS	Stainless Steel

Note: Cams are ordered separately

Type 4 Clamp

Made of stainless steel. Standard on wall mount UL Type 4 and 4X enclosures. Assembly includes clamp, spring and 1/4-20-304 or 1/4-28-316 threaded screw. Allows for a maximum of 24 inch spacing between clamps.

Catalog Number	Description
A-NH41041	NEMA 4 Clamp 304
A-NH41050	NEMA 4 Clamp 316

Type 12 Clamp

Made of stainless steel. Standard on wall mount UL Type 4 and 4X enclosures. Assembly includes clamp, spring and 1/4-20-304 or 1/4-28-316 threaded screw. Allows for a maximum of 24 inch spacing between clamps.

Catalog Number	Description
A-NH20030	NEMA 12 Clamp

Replacement Handle Kits

Kit includes handle, cam, retainers, hardware, latch rods, and latch rod guides. All kits are packaged for field installation.

Catalog Number	Enclosure Family	Description
A-HNDLSPWF	M12D	Keylocking assembly
A-261612-10-KIT	M12-FD-H	Padlocking 2-point assembly
A-HNDLSPN12D	M12D-FT	Keylocking assembly
A-HNDLSPX	FD-FT	Padlock with defeater assembly
A-HNDLSPXMN	FD-FT	Padlock non-defeater assembly
A-HNDLSPXM	M12FSD-FD	Padlock defeater assembly
A-HNDLSPXN	M12FSD-FD	Padlock non-defeater assembly
A-HNDLSPFS	M12FS	Keylocking assembly
A-3PTCONS	MSD	Console 3-point assembly

Custom Latches & Clamps

Custom latches and clamps can be used on standard or custom enclosures and will maintain the enclosure's UL rating. Spacing and quantity limitations apply to maintain an enclosure's UL rating. Call for application information. Specify type of latch, material and insert when ordering.

Quick Release J-Series Enclosure Clamps

- Available in zinc plated mild steel and stainless steel.
- Clamps have 1/4-20 thread.
- Suitable for UL type 4, 4X, 12 and 13 enclosures.

Catalog Number	Description
A-FOCJIC-S	Plated Mild Steel
A-FOCJIC-SS	Stainless Steel

Continued on next page →

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Custom Latches & Clamps *continued*

Quick Release Toggle Clamp

- Available in stainless steel.
- Clamps have 1/4-20 304 or 1/4-28 316 threads and can be used in place of screwdriver operated clamps on Milbank enclosures.
- Suitable for UL Type 4, 4X & 12 enclosures.

Catalog Number	Description
A-FOCX5	Type 304 stainless steel clamp
A-FOCXZ	Type 316 stainless steel clamp

Note: Stainless steel clamp required for 4/4X enclosure.

Mini ¼-Turn Latch

Catalog Number	Description
A-LTHMINI	Mini ¼-turn slotted latch

Wing ¼-Turn Latch

- Available in black polymide.
- Suitable for any Milbank enclosure.
- Latch will maintain the UL rating.

Catalog Number	Description
A-1000-U78	Wing 1/4-turn latch

Note: Cams are ordered separately.

Keylocking Wing ¼-Turn Latch

- Available in black polymide.
- Suitable for UL Type 12 enclosures.

Catalog Number	Description
A-1000-U237	Keylocking wing ¼-turn latch

Note: Cams are ordered separately.

Padlocking Wing ¼-Turn Latch

- Available in black polymide.
- Suitable for any Milbank enclosure.
- Latch will maintain the UL rating.
- Knockout size is .814 x .814

Catalog Number	Description
A-1000-U429-01	Padlocking wing ¼-turn latch

Note: Cams are ordered separately.

Padlocking ¼-Turn Latch

- Available in zinc die cast only and comes with chrome insert.
- Suitable for any Milbank enclosure.
- Latch will maintain the UL rating.
- Knockout size is .814 x .814

Catalog Number	Description
A-C0035745	Padlocking ¼-turn latch

Note: Cams are ordered separately.

Industrial Enclosure Accessories

Hole Seals and Grounding Kits

Oil Tight Hole Seals

Hole seals are used to seal unused pushbutton holes, conduit and knockout holes and other openings of irregular shapes and sizes against dust, dirt, water and oil. They will cover holes ranging in size from 0.19 inches through 4.00 inches, and can be used on enclosures having a wall thickness up to 0.31 inches. The hole seals have a cover with $\frac{1}{8}$ " flange. See page 76 for application, construction, ordering and installation information.

Grounding Kits

Ground kits include screws, nuts, washers and grounding label. Can be ordered separately. Ground strap not included.

J-Series Grounding Kit

Wall Mount Grounding Kit

Catalog Number	Description
A-JH45015	Grounding kit for J-Series enclosures
A-NH45015	Grounding kit for M4, M12 and Millennium enclosures

Notes:

1. Ground strap not included.
2. The wall mount version can be used on larger enclosures—order one kit per door.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Floor Mount Sub Panels

Applications

For use in Type 4 Double Door Floor Mount, Type 12 Double Door Floor Mount, and Type 12 Double Door Extra Volume enclosures.

Construction

Fabricated from 10 gauge carbon steel.

Finish

White polyester powder coat finish over cleaned phosphatized surfaces.

Options

Milbank can modify standard sub panels according to your specifications. Sizes and many more options are available. Quotations upon request.

Catalog Number	Sub Panel Size H x W x D (inches)	Shipping Weight (lbs.)

MILBANK
ENERGY AT WORK

Industrial Enclosure Accessories

Semi-Adjustable Swing Panel Kit

Applications

Allows for additional component mounting on a 90 degree swing panel.

Kit Includes

- Brackets with 3" slots for semi-adjustability (fabricated from 12 gauge carbon steel).
- Panel (fabricated from 12 gauge carbon steel).
- Quarter-turn wing latch(es).
- Bolt on continuous hinge.

Finish

White polyester powder coat over cleaned phosphatized surfaces. Aluminum kits have a polished #4 finish.

Options

Milbank can modify standard enclosures to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations upon request.

Note: A-SPK2's are for installation in N4, N12, MSD, and 3R only. Enclosure must be studded or have holes drilled. Customer can order these and use them in existing enclosures. The customer will have to drill holes in the sides of the enclosure to mount. Installation by Milbank will require an extra installation fee. Some assembly required.

Notes:

Must order the appropriate A-SPK3 (according to the depth of enclosure) for full adjustability. These brackets will be welded in each corner of enclosure and the Swing panel kit will be attached to them. If installing with a door stop kit, holes must be drilled in Swing panel flange. A-SPK3's are for installation in N4, N12, MSD, and 3R only. Installation by Milbank will require an extra installation fee. Some assembly required.

Weights for aluminum swing panels are not listed. Please contact Milbank for weight. Brackets for the swing panel kits must be ordered separate based on depth of enclosure.

++ For MSD Enclosures modify the part number to have an E. (example: A-SPK3E). Panel sizes will vary depending on enclosure.

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Industrial Enclosure Accessories

Heavy Duty Swing Panel Kit

Freestanding Swing Panel Kit

Double Door Floor Mount
Swing Panel Kit

Applications

Allows for additional component mounting on a 90 degree swing panel.

Kit Includes

- Brackets (fabricated from 12 gauge carbon steel).
- Panel (fabricated from 12 gauge carbon steel).
- Quarter-turn wing latch(es).
- Bolt on continuous hinge.
- Not applicable for Millennium series.

Designed for floor mounting of consolets and pushbutton enclosures.

Construction

Columns are fabricated from 14 gauge carbon steel with the flanges fabricated from 10 gauge carbon steel. Bases fabricated from 12 gauge.

- Two column and base sizes are available.
- Columns are flanged at each end and contain a gasketed access plate.
- Wiring connections can be made through the pedestal base.
- Gasket and screws are standard with each column.

Finish

Standard ANSI-61 gray finish on interior and exterior of enclosures.

Recoatable, smooth, white or RAL 7035 texture polyester powder coat available at no charge. Standard RAL and custom match finishes available for an additional charge, please contact Milbank for further assistance. All powder coat finishes applied over cleaned phosphatized surfaces. Columns and bases are ordered separately. A 60 degree adaptor is available to convert standard pushbutton enclosures to an operator station.

Options

Milbank can modify standard enclosures or custom design enclosures according to your specifications. Holes, cutouts, sizes, materials, and many more options are available. Quotations made upon request.

Industry Standards

- UL 50 Listed
- UL Type 12
- CUL Type 12

Available Colors

The color chips represented on these pages have been prepared as replications of actual powder coatings. Chips may vary slightly in color and gloss from actual coating due to the effects of heat, light and manufacturing process. Please contact your sales representative for more information.

Double Door Enclosure

- Special powder coat
- Special flush latch
- Special open right side

Double Door Cabinet

- Special light green powder coat
- Swing panels installed
- Ventilation filter installed
- 1/4" aluminum sunshield on standoffs
- Computer shelf on the left swing panel door

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Large Switchgear Unit

- Completely custom designed switchgear enclosure
- Multiple compartments and dividers
- Louvered plates
- Breaker cutouts and supporting "top hat" brackets

Control Panel

- Special two-color powder coat with customer exterior
- Special punching per customer in bottom
- Special window kit

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.

Stainless Steel Large Enclosure

- Special 11 gauge 316 stainless steel with $\frac{3}{16}$ " thick face
- Special keyboard compartment
- Special NEMA Type 4 window kits
- Recessed doors

Stainless Steel Large Enclosure

- Special 11 gauge 316 stainless steel with $\frac{3}{16}$ " thick face
- Special keyboard compartment
- Special NEMA Type 4 window kits
- Stainless steel painted beige

Utility requirements for this equipment may vary. Always consult the serving utility for their requirements before ordering or installing equipment.
