Industry News

IDEAL announce that the 2018 National Championship qualifying round has been extended to October 19th. The "Nationals" has been extremely popular across Canada, and with this extension IDEAL will be better able to meet the demand to hold qualifying events, particularly from colleges and trade schools.

Safety Message

Most contractors may know the code requirements but do not understand the correct detector type for all applications nor the limitation for the detector types. For example, the spot-type smoke detector has a maximum allowed spacing of 30 feet on center and 15 feet from a wall; however, does this spacing work for all applications? The short answer is no. The spacing should first be determined based on the detection goals of the owner.

GREAVES

Control Cable

G101602-PG

- Solid bare copper plenum rated control cable
- Has two solid conductors of size 16 AWG
- 100% layer 1 Duofoil® tape aluminum foil-polyester tape
- 65% layer 2 braided tinned copper shielding
- Voltage rating of 300V
- Suitable for power limited control circuits

Lil LED Wall Luminaire

LIL-LED-30K-MVOLT-DDBTXD-M12 & LIL-LED-40K-MVOLT-DDBTXD-M12

- Compact and energy efficient
- Photocell and batter pack options
- Great for installation above doors, balconies, garage or warehouse entrances, and security applications
- Easily mounts to recessed junction boxes or for surface mounting and conduit entry

Offset Al Mech Pin Adapter

KAPO350 & KAPO1/0

- AL9Cu Dual Rated for both copper and aluminum conductor

OMNICABLE

Self-Regulating Heating Cable

SR51J250, SR52J250, SR52J750

- Self regulating, pre-terminated cable
- Suitable for use on asphalt or wood shingles, metal roofing, or "membrane" type roofing, and downspouts that freeze and clog
- For commercial and residential applications
- All cable outer jackets are constructed of waterproof polyolefin material
- Applicable for freeze protection and temperature maintenance of metal and non-metallic pipe

Also Available SR-P Power Connection Kit

- Includes the SRP/SRPC power/splice connection kit, SRST in-line splice connection kit, SRES end seal kit, SRTCS tape and "caution" signs, GFST1 line plug, SRME end seal kit, and SRMPY power end connection kit.

EMERSON.

- Listed to UL Wire Connector Standard UL 486A-486B
- Rated for use with Fine Strand Conductor
- 600 Volt Rated
- Range taking conductor port

BURNDY®

Ground Clamp to Steel Connector

GCS26

- Direct burial rated for installation into earth and concrete
- Accepts beam thickness .125 - .625" (1/8 to 5/8")
- Conductor range from #6 to 2/0
- Versatile, allows parallel or perpendicular conductor orientation
- Stainless steel hardware
- Applicable for use in "extremely volatile environments"
- No special tooling required for installation

BURNDY®
